international agencies and private organizations are striving to alleviate Barriers to providing safe drinking water for rural  
areas and small communities that must be overcome include the financing and stability of small systems their operation and  
appropriate cost effective technologies to treat and deliver water to consumers While we know how to technically produce  
safe drinking water we are not always able to achieve sustainable safe water supplies for small systems in developed and  
developing countries Everyone wants to move rapidly to reach the goal of universal safe drinking water because safe water is  
the most fundamental essential element for personal and social health and welfare Without safe water and a safe  
environment sustained personal economic and cultural development is impossible Often small rural systems are the last in
