Playscheme resource manual Sandra Thoms, 2006 Provides practical advice for setting up playschemes for children with autistic spectrum disorders This work discusses the details of planning and how playschemes can encourage play social interaction and learning It is based on the NAS Playschemes Project in Glasgow

Authoring Autism M. Remi Yergeau, 2018-01-05 In Authoring Autism M Remi Yergeau defines neurodivergence as an identity neuroqueerness rather than an impairment Using a queer theory framework Yergeau notes the stereotypes that deny autistic people their humanity and the chance to define themselves while also challenging cognitive studies scholarship and its reification of the neurological passivity of autistics They also critique early intensive behavioral interventions which have much in common with gay conversion therapy and questions the ableist privileging of intentionality and diplomacy in rhetorical traditions Using storying as their method they present an alternative view of autistic rhetoricity by foregrounding

the cunning rhetorical abilities of autistics and by framing autism as a narrative condition wherein autistics are the best equipped people to define their experience. Contending that autism represents a queer way of being that simultaneously embraces and rejects the rhetorical Yergeau shows how autistic people queer the lines of rhetoric, humanity, and agency. In so doing, they demonstrate how an autistic rhetoric requires the reconceptualization of rhetoric's very essence. *Choosing and Using Curriculum* Joyce Herzog, 2015-03-16 Have you ever asked yourself any of these questions: What am I doing? Why am I doing it that way? Are there other ways? Which way is best for my family? Where do I get the resources I need to make it happen? How do I avoid over spending on curriculum? This book is a wealth of information. Topics and chapters include: Comparison of reading programs, Comparison of math programs, Developing written expression, Adapting materials for special situations, General homeschooling resources, Resources for blind, deaf, and speech language, Curriculum types and styles, How to take a snapshot of your child's progress. This book is a two hour read that will provide you with direction, comfort, and the means to make your homeschool some together in the ways you dream of. It will help you clear your brain and know your mind, and then find the resources you need to carry out your newly discovered vision. You don't want to start homeschooling without it. *A Practical Guide to Autism* Fred R. Volkmar, Lisa A. Wiesner, 2009-08-17 Autism is in the public spotlight now more than ever as new research and information appears almost daily. Although in many ways this is a positive development, it also presents challenges to families and practitioners who want to keep up with the latest developments and are left to sift through new information by themselves to see what is credible and relevant for them. Each of us needs a personal research assistant who can determine which information we need to pay attention to and let us know how it might affect our daily work and the children we are living with or serve. Since we each don't have our own research assistants on staff, I am delighted to recommend this wonderful book by Fred Volkmar and Lisa Wiesner. Both of these talented professional leaders have combined their scientific skills and understanding of the field with great practical experience and ideas about how research can be translated into clinical practice. The result is a book that provides the best and most comprehensive information about recent scientific developments and a splendid practical guide for how they are being implemented and what we are learning in the process. The issues are presented in all of their complexity but translated into language that is clear, direct, and easy to follow. The format also lends itself to understanding the complex issues and their implications through excellent charts, question and answer sections, and chapters that vary from describing diagnostic issues to stating very specifically how to expand and evaluate the services one is receiving. The comprehensive references and lists of additional resources also add greatly to the overall package. As a professional dedicated to understanding scientific advances and helping families and teachers to utilize them most effectively, I am very pleased to have an ally like this book available. I am very grateful to the authors for providing a very credible, practical, and relevant addition to our field to help the many advocates and family practitioners to better understand the exciting new developments and how they can be implemented in
