The Looking:

The looking machine David MacDougall, 2019-01-11 This new collection of essays presents the latest thoughts of one of the world's leading ethnographic filmmakers and writers on cinema. It will provide essential reading for students in cinema studies, filmmaking, and visual anthropology. The dozen wide-ranging essays give unique insights into the history of documentary, how films evoke space, time, and physical sensations, and the intellectual and emotional links between filmmakers and their subjects. In an era of reality television, historical re-enactments, and designer packaging, MacDougall defends the principles that inspired the earliest practitioners of documentary cinema. He urges us to consider how the form can more accurately reflect the realities of our everyday lives. Building on his own practice in filmmaking, he argues that this means resisting the pressures for self-censorship and the inherent ethnocentrism of our own society and those we film.

Diabetes Through the Looking Glass, 2009 The author combines her own experience growing up with diabetes and interviews with children and adults to provide an insight into what it feels like to grow up with diabetes. It covers the different phases of diagnosis and acceptance, hypoglycaemia, blood tests, and injections, school, and teenage years, life beyond home.

Through The Looking Glass : Om Illustrated Classics Lewis Carroll, 2018-08 *Through The Looking Glass* is the sequel to Alice's Adventures in Wonderland. It is based on his meeting with another Alice, Alice Raikes. Set some six months later than the earlier book, Alice again enters a fantastical world, this time by climbing through a mirror into the world that she can see beyond it. The book takes a look at the world of the mirror and the world beyond it. Reflections, distortions, and fantasy are major ingredients in this wonderful book, which brings together the worlds of the child and the adult. Sparkling characters are found in the narrative, ranging from Humpty Dumpty to the Red Queen to the Unicorn. The story opens on a snowy wintry night, uses frequent changes in time and spatial directions as a plot device, and draws on the imagery of chess. In it, there are many mirror themes, including opposites, time running backwards, and so on.

Victorian Literature in the Looking Glass of Psychology Melinda Gorgan, 2011-08 *Victorian Literature in the Looking Glass of Psychology* is an interdisciplinary study that observes the changes in literary character construction throughout the Victorian Age. Pursuing the epistemologically altered character construction over the years from the beginning to the end of the Victorian era, the book covers a range of titles that demonstrate that the progress of psychology was responsible for the way the workings of the mind were understood. It addresses the changes that characters underwent in the fifty years passing from *Jane Eyre* to *Dracula*. The influence of psychology on literature is tracked step by step through the Victorian age, starting with Charlotte Brontë's *Bildungsroman* and Dickens's realism, and ending with the inward turn, the focus on the psychological mechanisms of the individual in Henry James, Robert Louis Stevenson, Oscar Wilde, and Bram Stoker. For scholars interested in an up-to-date critical approach to Victorian literature, focusing on interdisciplinarity, discourse negotiations, and psychosynthetic literary analysis, the book will be a valuable reference source.
