## **The Of Looks:**

**The Power of Looks** Bonnie Berry, 2016-02-24 There is a saying that beauty is in the eye of the beholder implying that beauty is subjective But can it be said that better looking people have more social power This book provides a fascinating insight into the social stratification of people based on looks the artificial placement of people into greater and lesser power strata based on physical appearance The author analyzes different aspects of physical appearance such as faces breasts eye shapes height and weight as they are related to social power and inequality For example tall people are often associated with power with tall people being seen publicly as more capable and thus more deserving of power than shorter people The author moreover assesses how people's physical appearance affects their chances of marriage employment education and other social and economic opportunities The book contributes to and differentiates itself from current literature by emphasizing sociological theory including constructionism and critical theory and research to understand the phenomenon of social aesthetics a term coined by the author to refer to the social reaction to physical appearance *Oxford Handbook of the Psychology of Appearance* Nichola Rumsey, Diana Harcourt, 2012-05-31 We live in a society in which messages associating physical attractiveness with success and happiness are pervasive There is an epidemic of appearance concerns amongst teenagers and adults in westernised countries and body image dissatisfaction is now considered normative Large numbers of people experience negative impacts on wellbeing and for many adolescents adults and even children appearance concerns are influential in choices about a range of health behaviours The challenges facing them include difficulties with social encounters and the problem of having to cope with negative self perceptions The Oxford Handbook of the Psychology of Appearance is a comprehensive reference text written by experts in the field It examines how people feel about the way they look and why it is that some people are happy with their appearance whilst increasing numbers are troubled by the way they look reporting that these appearance related concerns affect many aspects of their lives including relationships health and well being It considers the influence of other people and how the media affects thoughts and behaviours related to appearance It explores the experiences of people living with a disfigurement in a society that seems to be increasingly focussed on appearance and the pursuit of an idealised image of beauty size and weight Exploring a topic that has been often neglected in the psychological literature this book will be invaluable for health clinical and social psychologists health professionals working with patients with visible differences and those in the field of public health and education *The Measurement of Appearance* Richard S. Hunter, Richard W. Harold, 1987-09-08 This second edition of a unique text reference identifies the appearance attributes of objects and the methods available for measuring them bringing together much material not previously organized for ready reference The primary premise here is that object appearance involves not only color but such attributes as gloss luster and translucency The first part of the book concerned with nature of appearance draws from the fields of physiology and psychology and considers the eye brain combination and the way it receives and

interprets light signals This is followed by a consideration of the optical properties of objects from the physical standpoint The second part of the book deals with the numerical scales used to measure object appearance The discussion here draws on psychophysics in describing the uses of physical techniques to give numbers having psychological significance The third part of the book covers instruments for the measurement of the attributes of object appearance their principles of design and a survey of the major ones in use The final chapter discusses specific applications of appearance measurement Includes appendixes and a glossary

**Comprehension of verb inflection in German-speaking children** Brandt-Kobe, Oda-Christina,2014-10-09 Previous studies on the acquisition of verb inflection in normally developing children have revealed an astonishing pattern children use correctly inflected verbs in their own speech but fail to make use of verb inflections when comprehending sentences uttered by others Thus a three year old might well be able to say something like The cat sleeps on the bed but fails to understand that the same sentence when uttered by another person refers to only one sleeping cat but not more than one The previous studies that have examined children s comprehension of verb inflections have employed a variant of a picture selection task in which the child was asked to explicitly indicate via pointing what semantic meaning she had inferred from the test sentence Recent research on other linguistic structures such as pronouns or focus particles has indicated that earlier comprehension abilities can be found when methods are used that do not require an explicit reaction like preferential looking tasks This dissertation aimed to examine whether children are truly not able to understand the connection the the verb form and the meaning of the sentence subject until the age of five years or whether earlier comprehension can be found when a different measure preferential looking is used Additionally children s processing of subject verb agreement violations was examined The three experiments of this thesis that examined children s comprehension of verb inflections revealed the following German speaking three to four year old children looked more to a picture showing one actor when hearing a sentence with a singular inflected verb but only when their eye gaze was tracked and they did not have to perform a picture selection task When they were asked to point to the matching picture they performed at chance level This pattern indicates asymmetries in children s language performance even within the receptive modality The fourth experiment examined sensitivity to subject verb agreement violations and did not reveal evidence for sensitivity toward agreement violations in three and four year old children but only found that children s looking patterns were influenced by the grammatical violations at the age of five The results from these experiments are discussed in relation to the existence of a production comprehension asymmetry in the use of verb inflections and children s underlying grammatical knowledge
