Cotton ,1924 *Abstract Entity Anaphora in Argumentative Texts* Donghong Liu,2023-08-21 This book focuses on abstract entity anaphora in argumentative texts with Asher s 1993 Segmented Discourse Representation Theory SDRT as the theoretical framework investigating its pragmatic features and exploring its referent interpretation The data sources include more than 160 000 word argumentative texts 80 000 word English texts and 80 000 word Chinese ones selected from newspapers journals and books in China and America At first a comparative study was done between Chinese

and English argumentative texts so as to compare the pragmatic features of abstract entity anaphora in the two languages Then referent interpretation is explored within the SDRT framework Although SDRT can account for most of the instances of abstract entity anaphora it appears incompetent in dealing with some phenomena in the data of our study Seven problems in SDRT were found and corresponding solutions were proposed in an attempt to improve this theory In general this book has three aspects of significance Firstly it establishes abstract entity anaphora as an independent and a special kind of anaphora Secondly the research methods are the combination of empirical study and theoretical hypotheses as well as the coalescent of dynamic study and static study Thirdly the book is not limited to the application of SDRT to Mandarin Chinese and backward anaphora Instead based on the linguistic phenomena in the data it challenges and improves the theory and it even negates some aspects and meanwhile brings forward new solutions

Smart Business Networks Peter H.M. Vervest, Eric van Heck, Ken Preiss, Louis-Francois Pau, 2005-12-14 Scientists from management and strategy information systems engineering and telecommunications have discussed a novel concept Smart Business Networks They see the future as a developing web of people and organizations bound together in a dynamic and unpredictable way creating smart outcomes from quickly re configuring links between actors The question is What should be done to make the outcomes of such a network smart that is just a little better than that of your competitor More agile with less pain with more return to all the members of the network now and over time The technical answer is to create a business operating system that should run business processes on different organisational platforms Business processes would become portable The end to end management of processes running across many different organizations in many different forms would become possible This book presents you the outcomes of an energizing

and new direction in management science **Information and Creation** German Golitsyn,Vladimir Petrov,2012-12-06 This book is devoted to one of the central problems of contemporary thinking for which c P Snow in 1959 coined the phrase of the Two Cultures In this concept human endeavour is directed on one side to the forward looking sci ences mathematics physics chemistry biology etc and on the other side to the backward looking humanities including psychology linguistics sociology etc In this dichotomy Snow saw no possibility of unification On the other hand the urge towards self consistency and harmony in the mental and spiritual lives of both man and society as a whole is clearly one of the major forces of creativity both scientific and artistic This force aims at the unification of the Two Cultures in order to build an integrated self consistent system for our intellectual life Some attempts in this direction have been made before and will be described in this book It is our aim to contribute to the achievement of an integrated mental life on the basis of information theory In order to construct our model we examine the laws of information theory leading us to the deduction of the main laws inherent in both cultures Thus we consider the evolution of both non living and living matter human behaviour the phenomenon of language the sphere of aesthetics etc We hope that our work will be useful both for researchers who are trying to derive different integral theories and for various other consumers of scientific knowledge meaning broad circles of intellectuals **Significant Secular and**

Sacred Matters in America H.G.
