## **The Origin And Nature Of The Emotions:**

**The Origin and nature of the emotions** c.2 George Washington Crile, 1915 Presents a series of miscellaneous papers on the physiology of emotion In the first of these addresses the Ether Day Address delivered at the Massachusetts General Hospital in October 1910 I first enunciated the Kinetic Theory of Shock the key to which was found in laboratory researches and in a study of Darwin's Expression of the Emotions in Man and in Animals whereby the phylogenetic origin of the emotions was made manifest and the pathologic identity of surgical and emotional shock was established Since 1910 my associates and I have continued our researches through a Histologic studies of all the organs and tissues of the body b Estimation of the H ion concentration of the blood in the emotions of anger and fear and after the application of many other forms of stimuli c Functional tests of the adrenals and d Clinical observations Striking changes produced by fear and anger and by physical trauma in the brain were also investigated in other organs Many of the arguments and illustrations by which the primary premises were established are repeated a few in all many in more than one of these addresses It will be observed however that the application of these premises varies and that their significance broadens progressively Pref PsycINFO Database Record c 2005 APA all rights reserved **The Origin and Nature of the Emotions** George W. would seem that if the striking changes produced by fear and anger and by physical trauma in the master organ of the body the brain were due to WORK then we should expect to find corresponding histologic changes in other organs of the body as well We therefore examined every organ and tissue of the bodies of animals which had been subjected to intense fear and anger and to infection and to the action of foreign proteins some animals being killed immediately some several hours after the immediate effects of the stimuli had passed some after seances of strong emotion had been repeated several times during a week or longer
