The Hermes Fall:

The Hermes Fall John Baxter, 1978 **Incoming Asteroid!** Duncan Lunan, 2013-10-17 Incoming Asteroid is based on a project within ASTRA the Association in Scotland to Research into Astronautics to provide scientific answers to the question what would we do if we knew there was going to be an asteroid impact in ten years time or less Clearly there are many things humanity can do nothing about for example an unseen object traveling towards us so fast that we have no time to prepare or an object so large it may be unstoppable A realistic hazard model was decided upon and the scenario developed from that an incoming object about 1 kilometer in diameter in an orbit ranging from the outer rim of the Asteroid Belt to within that of Earth's Three basic possibilities are considered in this book The first is the deflection of the asteroid using remote probes along with a number of possible technologies to change the asteroid's course Second is the attempt of a manned mission in order to plant a propulsion system on the asteroid to push it into a different orbit Third is the nuclear option a last ditch attempt to break up and then disperse the asteroid using nuclear weapons A rather impractical combination of these second and third options were used as the plot of the popular 1998 Bruce Willis feature film Armageddon Although the cost of developing the technology needed to protect the Earth would be substantial there would certainly be spin off benefits These could eventually result in practical small scale atomic energy sources new propulsion systems that could make extraterrestrial mining within the solar system a possibility and other as yet unforeseen benefits And finally Incoming Asteroid considers the political implications how governments across the world should best react to the threat with a view to minimizing loss of life and in the weeks running up to the possible impact preventing panic in the population Greek Erotic Epigram Maria Kanellou, 2025-03-19 Despite its small size epigram attracted some of the best poetic talents of antiquity exerting a strong influence on Latin literature and continuing to inspire poetic creativity until today During the last decades research on epigram flourished to an unprecedented degree Greek Erotic Epigram A Diachronic Approach draws on and engages with this renewed scholarly interest in the briefest of the ancient Greek genres By shifting focus away from a particular poet collection and the epigrammatic production of a specific historical period it explores diachronically erotic epigram from various interpretative angles treating the surviving material as an organic whole Four motifs drive diachronic research encompassing a wide chronological span from the Hellenistic up until the early Byzantine era the lamp sea and nautical imagery the beloved's comparison to Aphrodite and Eros and the Erotes By analysing how these motifs were shaped and adapted over the centuries the book illustrates the epigrammatists changing attitudes towards the material inherited from earlier poetic tradition and leads to a deeper appreciation of the narrative techniques adopted by them as well as of the inner dynamics of poetic imitation and competition Moreover the scrutiny of the motifs within wider literary and historical backgrounds reveals the influence exerted by different cultural and sociopolitical environments on the epigrammatists work in the course of centuries The book offers a model for the type of diachronic research that can be

applied to other epigrammatic subgenres and other motifs and to Latin epigram
