The LNER Handbook David Wragg, 2017-07-03 Renowned for its express locomotive Mallard setting a world speed record 126mph for steam locomotives that endures to this day the London North Eastern Railway was the second largest of the Big Four railway companies to emerge from the 1923 grouping and also the most diverse with its prestigious high speed trains from King's Cross balanced by an intensive suburban and commuter service from Liverpool Street and a high dependence on freight. Noted for its cautious board and thrifty management the LNER gained a reputation for being poor but honest. Forming part of a series along with *The GWR Handbook*, *The LMS Handbook* and *The Southern Railway Handbook* this new edition provides an authoritative and highly detailed reference of information about the LNER. **Locomotive Management - Cleaning, Driving And Maintenance** T. This book is the sequel to the author's two previous volumes on the history of the Great Eastern, covering the Early Years from 1811 to 1862 and the Late 19th Century and early 20th Century from 1862 to 1924. This book covers the years 1923 to 2023, describes how the Great Eastern Section of the London and North Eastern Railway was transformed from being something of a backwater during the inter-war years to being very much at the forefront of modernisation under British Railways. Within the book will be found how the Great Eastern Section coped with the threat of road competition during the inter-war years, its involvement in the Second World War and how under British Railways it came to be seen the epitome of modernisation, beginning with the arrival of the Britannia Class locomotives in 1951 and culminating the complete elimination of steam power in the East of England at the end of 1963. The book describes the

impact of the Beeching Report on the former Great Eastern It chronicles the progress of the Section s through the electrification of its two main lines and the construction and opening of the Elizabeth Line Preservation is also mentioned as are possible future developments It is book for anyone who is interested in the history of the railways of the East of England railways in general and the history of the East of England **The Railway Engineer** Lawrence Saunders,S. Blundstone,1925 *The Great Central Railway* John Palmer,2021-01-30 Sets out to address what really happened through its LNER days and into British Railways custodianship A well researched and presented tome Key Model World For generations of railway enthusiasts and more lately for social historians the life and times of the former Great Central Railway and in particular its extension towards London in the 1890s and closure seventy years later have generated considerable interest and controversy Although many books have been written about the Railway the majority in recent times have concentrated upon providing a photographic record and a nostalgic look in retrospect to what was generally perceived as happier times for the route None of the books have presented the outcome from thorough research into the business aspects of the Railway and its successive private LNER and public BR ownerships through war and peace and times of industrial social and political change that influenced and shaped the demand for a railway service While retaining a strong railway theme throughout the book identifies the role played by successive governments the electricity and coal industries and the effect of social change that together resulted in a case for closure The content of the book replaces much supposition with fact and places on record what really happened The final part of the book acknowledges the fine work over half a century of volunteers dedicated to saving a section of the line in Leicestershire A valuable addition to the social and political history of railways The Railway Correspondence and Travel Society **Southern and Isle of Wight Railways** Brian Reading,Ian
