The Logic Of The Cultural Sciences Five Studies:

The Logic of the Cultural Sciences Ernst Cassirer, 2000 This new translation of The Logic of the Cultural Sciences formerly entitled The Logic of the Humanities makes Ernst Cassirer's classic study long out of print available to English readers A German Jew living in exile at the beginning of the Second World War Cassirer wrote this book one of his clearest and most concise in response to the crises besetting his era It represented to him a rethinking and completion of his magnum opus The Philosophy of Symbolic Forms S G Lofts's translation stays close to the original German and accurately reflects the echoes of the philosophical debates of Cassirer's day In the book's five linked studies Cassirer considers the intellectual structure of the disciplines we commonly refer to as the humanities He defines and justifies the basic philosophical perspective of the philosophy of symbolic forms and he contributes a wealth of ideas to continuing debates about culture and what is unique in human nature

Ernst Cassirer Edward Skidelsky, 2011-10-24 This is the first English language intellectual biography of the German Jewish philosopher Ernst Cassirer 1874-1945 a leading figure on the Weimar intellectual scene and one of the last and finest representatives of the liberal idealist tradition Edward Skidelsky traces the development of Cassirer's thought in its historical and intellectual setting He presents Cassirer the author of The Philosophy of Symbolic Forms as a defender of the liberal ideal of culture in an increasingly fragmented world and as someone who grappled with the opposing forces of scientific positivism and romantic vitalism Cassirer's work can be seen Skidelsky argues as offering a potential resolution to the ongoing conflict between the two cultures of science and the humanities and between the analytic and continental traditions in philosophy The first comprehensive study of Cassirer in English in two decades this book will be of great interest to analytic and continental philosophers intellectual historians political and cultural theorists and historians of twentieth century Germany

Symbolic Forms and Cultural Studies Cyrus Hamlin, John Michael Krois, 2004-01-01 Cassirer's conception of culture theory of symbolism anticipated much of later cultural theory The essays in this volume explore aspects of his thinking demonstrate the influence that it had on later scholarship

Ernst Cassirer Jonas Hansson, Svante Nordin, 2006 Ernst Cassirer was professor in Göteborg from 1935 to 1941 This episode of his life is little known even though the Swedish years were very important During that time of political turmoil he wrote several books and most of the papers that are now being published posthumously This book based on recently discovered sources gives a detailed picture of Cassirer's life and work in Sweden It explains how he was invited to Sweden and why he became a Swedish citizen The analyses show how Cassirer's exchange with Swedish philosophers influenced his work and shed new light on his development during exile This study also contains an introduction by John Michael Krois a chronology of the Swedish years and a description of the long lost manuscript of Das Erkenntnisproblem volume four

The Challenges of Cultural Psychology Gordana Jovanović, Lars Allolio-Näcke, Carl Ratner, 2018-09-28 This book considers cultural psychology from historical theoretical and epistemological perspectives building an understanding of cultural psychology as a human

science and moving beyond the nature culture dichotomy The unique collection of chapters seeks to advance the field of cultural psychology by reviving its historical legacies and arguing for its social responsibility in future historical developments It considers European legacies for cultural psychology as developed by leading figures such as Giambattista Vico Wilhelm Wundt Wilhelm Dilthey and Ernst Cassirer in order to provide insights into a long tradition of thinking from a cultural psychology perspective The book discusses historical pathways in the rise and repression of cultural psychology and its different historical forms arguing for the necessity of decolonizing psychology securing a place for culture in it and developing an epistemology suited to humankind s meaning making processes in mutual shaping of psyche and culture It provides an integrative and historical understanding of the subject and uses the diversity and heterogeneity within the field to offer critical reflections on its achievements The thoroughly international group of contributors brings diverse analyses of self body emotions culture and society and considers the future of cultural psychology The volume is a stimulating read for scholars and students of cultural and theoretical psychology and related areas including philosophy anthropology and history

Aesthetics and Neuroscience Zoï Kapoula, Marine Vernet, 2016-11-30 This edited monograph provides a compelling analysis of the interplay between neuroscience and aesthetics The book broaches a wide spectrum of topics including but not limited to mathematics and creator algorithms neurosciences of artistic creativity paintings and dynamical systems as well as computational research for architecture The international authorship is genuinely interdisciplinary and the target audience primarily comprises readers interested in transdisciplinary research between neuroscience and the broad field of aesthetics

Heidegger and the Work of Art History Amanda Boetzkes, 2017-07-05 Heidegger and the Work of Art History explores the impact and future possibilities of Heidegger s philosophy for art history and visual culture in the twenty first century Scholars from the fields of art history visual and material studies design philosophy aesthetics and new media pursue diverse lines of thinking that have departed from Heidegger s work in order to foster compelling new accounts of works of art and their historicity This collected book of essays also shows how studies in the history and theory of the visual enrich our understanding of Heidegger s philosophy In addition to examining the philosopher s lively collaborations with art historians and how his longstanding engagement with the visual arts influenced his conceptualization of history the essays in this volume consider the ontological and ethical implications of our encounters with works of art the visual techniques that form worlds how to think about things beyond human centred relationships the moods dispositions and politics of art s history and the terms by which we might rethink aesthetic judgment and the interpretation of the visible world from the early modern period to the present day

George Herbert Mead's Concept of Society Jean-François Côté, 2015-12-03 This book offers a new look at Mead s concept of society in an attempt to reconstruct its significance for sociological theory Chapter 1 offers a critical genealogical reading of writings from early articles to the latest books where Mead articulates his views on social reform social psychology and the gradual theorization of self and society Chapter 2 pays attention to the phylogenetic and

ontogenetic processes at work in both the self and society by comparing Mead's social psychology with Freudian and Lacanian psychoanalysis Chapter 3 brings together all the elements that are part of the structures of self and society within a topological and dialectical schematization of their respective and mutual relations Chapter 4 is devoted to the passage of Mead's views from social psychology to sociology with a critical look at Herbert Blumer's developments in symbolic interactionism as the presumed main legitimate heir of Mead's social psychology Chapter 5 examines how Mead's general philosophical views fit within the new epistemological context of contemporary society based on communication and debates on postmodernity *Ernst Cassirer and the Critical Science of Germany, 1899-1919* Gregory B. Moynahan, 2013-07-15 Recovering a lost world of the politics of science in Imperial Germany Gregory B Moynahan approaches the life and work of the philosopher and historian Ernst Cassirer 1874-1945 from a revisionist perspective using this framework to redefine the origins of twentieth century critical historicism and critical theory The only text in English to focus on the first half of the polymath Cassirer's career and his role in the Marburg School this volume illuminates one of the most important and in English least studied reform movements in Imperial Germany **Are Cyborgs Persons?** Aleksandra Łukaszewicz Alcaraz, 2020-12-22 This book presents argumentation for an evolutionary continuity between human persons and cyborg persons based on the thought of Joseph Margolis Relying on concepts of cultural realism and post Darwinism Aleksandra Łukaszewicz Alcaraz redefines the notion of the person rather than a human and discusses the various issues of human body enhancement and online implants transforming modes of perception cognition and communication She argues that new kinds of embodiment should not make acquiring the status of the person impossible and different kinds of embodiments may be accepted socially and culturally She proposes we consider ethical problems of agency and responsibility critically approaching vitalist posthuman ethics and rethinking the metaphysical standing of normativity to create space for possible cyborgian ethics that may be executed in an Extended Republic of Humanity
