The Opening Mind A Philosophical Study Of Humanistic Concepts:

The Opening Mind Morris Weitz, 1977 *The Architecture of Concepts* Peter de Bolla, 2013-12-02 *The Architecture of Concepts* proposes a radically new way of understanding the history of ideas Taking as its example human rights it develops a distinctive kind of conceptual analysis that enables us to see with precision how the concept of human rights was formed in the eighteenth century The first chapter outlines an innovative account of concepts as cultural entities The second develops an original methodology for recovering the historical formation of the concept of human rights based on data extracted from digital archives This enables us to track the construction of conceptual architectures over time Having established the architecture of the concept of human rights the book then examines two key moments in its historical formation the First Continental Congress in 1775 and the publication of Tom Paine's *Rights of Man* in 1792 Arguing that we have yet to fully understand or appreciate the consequences of the eighteenth century invention of the concept rights of man the final chapter addresses our problematic contemporary attempts to leverage human rights as the most efficacious way of achieving universal equality *Philosophical Approaches to Literature* William E. Cain, 1984 This volume presents eleven new essays that reveal how significant nineteenth and twentieth century writers have drawn from and in some cases opposed major trends in philosophy Essays in this collection deal with Tennyson Coleridge Woolf Faulkner De Quincey Beckett romance as a genre the state of contemporary literary theory as shaped by the writings of Wittgenstein Ricoeur and Derrida and other topics **Divine Agency and Divine Action, Volume I** William J. Abraham, 2017-10-27 *Divine Agency and Divine Action Volume I* lays the groundwork for a constructive contribution to the contemporary debate regarding divine action Noted scholar William J. Abraham argues that the concept of divine action is not a closed concept like knowledge but an open concept with a variety of context dependent meanings The volume charts the history of debate about divine action among key Anglophone philosophers of religion and observes that they were largely committed to this erroneous understanding of divine action as a closed concept After developing an argument that divine action should be understood as an open fluid concept Abraham engages the work of William Alston Process metaphysics quantum physics analytic Thomist philosophy of religion and the theology of Kathryn Tanner Abraham argues that divine action as an open concept must be shaped by distinctly theological considerations and thus all future work on divine action among philosophers of religion must change to accord with this vision Only deep engagement with the Christian theological tradition will remedy the problems ailing contemporary discourse on divine action *Artistic Freedom in International Law* Eleni Polymenopoulou, 2023-04-13 The book examines in detail the essence nature and scope of artistic freedom as a human right It explains the legal problems associated with the lack of a precise definition of the term art and discusses the emergence of a distinct right to artistic freedom under international law Drawing on a variety of case studies primarily from the field of visual arts but also performance street art and graffiti it examines potentially applicable defences for those types of artistic expression that are perceived as

inappropriate ugly offensive disturbing or even obscene and transgressive The book also offers a view on global controversies such as Charlie Hebdo and the Danish Cartoons attempting to explain the subtleties of offenses related to religious sensibilities and beliefs It also examines the legitimacy of restrictions on extremist expressions in the case of arts involving criminal arts such as child pornography

The Routledge Companion to Twentieth Century Philosophy Dermot Moran, 2008-10-27 Featuring twenty two chapters written by leading international scholars this major publication covers all the key figures and movements from Frege to Derrida and philosophy of language to feminist philosophy

Virtuosity and the Musical Work Jim Samson, 2007-04-23 This book is about three sets of etudes by Liszt the Etude en douze exercices 1826 its reworking as Douzes grandes tudes 1837 and their reworking as Douzes tudes d ex cution transcendante 1851 At the same time it is a book about nineteenth century instrumental music in general in that the three works invite the exploration of features characteristic of the early Romantic era in music These include a composer performer culture the concept of virtuosity the significance of recomposition music and the poetic and the consolidation of a musical work concept A central concern is to illuminate the relationship between the work concept and a performance and genre orientated musical culture At the same time the book reflects on how we might make judgements of the Transcendentals of the Symphonic Poem Mazeppa based on the fourth etude and of Liszt s music in general

Derrida on the Mend Robert Magliola, 1984 Magliola s exposition of Derrida has been acclaimed as the best in English Indeed it is the only account I know which brings an alert and independent questioning mind to bear on Derrida s arguments a mind which at times seems to play Kierkegaard into Derrida s Hegel Japanese Journal of Religious Studies Philosophy

Paul s Letters and Contemporary Greco-Roman Literature Paul Robertson, 2016-05-23 In this volume Paul Robertson re describes the form of the apostle Paul s letters in a manner that facilitates transparent empirical comparison with texts not typically treated by biblical scholars Paul s letters are best described by a set of literary characteristics shared by certain Greco Roman texts particularly those of Epictetus and Philodemus Paul Robertson theorizes a new taxonomy of Greco Roman literature that groups Paul s letters together with certain Greco Roman ethical philosophical texts written at a roughly contemporary time in the ancient Mediterranean This particular grouping termed a socio literary sphere is defined by the shared form content and social purpose of its constituent texts as well as certain general similarities between their texts authors

Philosophical Perspectives on Memory and Imagination Anja Berninger, Ingrid Vendrell Ferran, 2022-11-04 This book explores the structure and function of memory and imagination as well as the relation and interaction between the two states It is the first book to offer an integrative approach to these two emerging areas of philosophical research The essays in this volume deal with a variety of forms of imagining and remembering The contributors come from a range of methodological backgrounds empirically minded philosophers analytic philosophers engaging mainly in conceptual analysis and philosophers informed by the phenomenological tradition Part 1 consists of novel contributions to ontological issues regarding the nature of memory and

imagination and their respective structural features Part 2 focuses on questions of justification and perspective regarding both states The chapters in Part 3 discuss issues regarding memory and imagination as skills or abilities Finally Part 4 focuses on the relation between memory imagination and emotion Philosophical Perspectives on Memory and Imagination will be of interest to scholars and advanced students working in philosophy of memory philosophy of imagination philosophy of mind and epistemology Literary Intention, Literary Interpretations, and Readers John Maynard, 2009-04-17 This accessible personal and provocative study returns to the major subject in literary discussion before and during the relatively recent flourishing of literary theory that of literary intention Does the author's personal intention or historical site determine a correct interpretation of a literary work Probing the entire range of issues connected with this many faceted and knotty concept this book engages with interpretation on both theoretical and practical levels It argues that the hard questions about interpretation connected to issues of intention cannot be sidestepped or ignored It does not argue for conservative concepts of literature itself nor against the major historical engagements of critics in our time But in addressing those who continue to read or teach literature it does insist on a level of sophistication in issues of literary interpretation that cannot be assured by historical research and knowledge of the social and cultural connections to literary works The overall aim of the work is to recall readers to the great complexity pleasure and interest of literary interpretation **Metamodernism** Jason Ananda Josephson Storm, 2021-06-07 Not only an astute diagnosis of the confusions and contradictions of contemporary thought it also offers compelling alternatives Rita Felski author of *Hooked Art and Attachment* For decades scholars have been calling into question the universality of disciplinary objects and categories The coherence of defined autonomous categories such as religion science and art has collapsed under the weight of postmodern critiques calling into question the possibility of progress and even the value of knowledge Jason nanda Josephson Storm aims to radicalize and move beyond these deconstructive projects to offer a path forward for the humanities and social sciences using a new model for theory he calls metamodernism Metamodernism works through the postmodern critiques and uncovers the mechanisms that produce and maintain concepts and social categories In so doing Storm provides a new radical account of society's ever changing nature what he calls a Process Social Ontology and its materialization in temporary zones of stability or social kinds Storm then formulates a fresh approach to philosophy of language by looking beyond the typical theorizing that focuses solely on human language production showing us instead how our own sign making is actually on a continuum with animal and plant communication Storm also considers fundamental issues of the relationship between knowledge and value promoting a turn toward humble emancipatory knowledge that recognizes the existence of multiple modes of the real Metamodernism is a revolutionary manifesto for research in the human sciences that offers a new way through postmodern skepticism to envision a more inclusive future of theory in which new forms of both progress and knowledge can be realized **100 Years of ›Tractatus Logico-Philosophicus‹ - 70 Years after Wittgenstein's Death** Esther Heinrich-Ramharter, Alois

Pichler, Friedrich Stadler, 2025-04-21 This volume covers the origin interpretations and reception of Wittgenstein's Tractatus Logico Philosophicus and offers a critical assessment of the related research and contemporary historiography. The authors deal with an evaluation of research on Wittgenstein's philosophy, life and work as well as of the editions of his work published since his death. This includes upcoming editions with a special focus on the availability of Wittgenstein's digital Nachlass. Special attention is given to the reception of and references to the Tractatus in the middle and later Wittgenstein as well as the reception by other philosophers. Moreover, open philosophical, ethical and unresolved scientific questions are addressed with a critical investigation of current research. Furthermore, the complex, diverse and mutual relation of Wittgenstein and the Vienna Circle of Moritz Schlick, Otto Neurath, Friedrich Waismann and others are addressed. **Wittgenstein, Aesthetics**

and Philosophy Peter B. Lewis, 2017-05-15 Although universally recognised as one of the greatest of modern philosophers, Wittgenstein's work in aesthetics has been unjustly neglected. This is the first book exclusively devoted to Wittgenstein's aesthetics, exploring the themes developed by Wittgenstein in his own writing on aesthetics as well as the implications of Wittgenstein's wider philosophical views for understanding central issues in aesthetics. Drawing together original contributions from leading international scholars, this book will be an important addition to studies of Wittgenstein's thought, but its discussion of issues in literature, music and performing art and criticism will also be of interest to many students of literary and cultural studies. Exploring three key themes: the capacity of the arts to illuminate our lives; the nature of the particular responses involved in understanding and appreciating works of art; the role of theory and principle in artistic and critical practice, the contributors address issues raised by contemporary philosophers of art and seek to make connections between Wittgenstein's work and that of other significant philosophies of art in the Western tradition. Displaying the best practice of modern philosophical writing: clarity, cogency, respect for but not blind obedience to common sense, argument illustrated with detailed examples, rejection of speculation and pretension, this book demonstrates how philosophy can make a valuable contribution to understanding the arts. **Philosophy and Art** Daniel O. Dahlstrom, Daniel O.

Dahlstrom, 2018-03-02 The 13 essays in this collection are marked by a diversity of philosophical styles and perspectives on art. While some authors focus on specific forms of art, others are more concerned with the interpretation given to art by past and contemporary philosophy. Artistic Judgement Graham McFee, 2011-01-13 Artistic Judgement sketches a framework for an account of art suitable to philosophical aesthetics. It stresses differences between artworks and other things and locates the understanding of artworks both in a narrative of the history of art and in the institutional practices of the art world. Hence its distinctiveness lies in its strong account of the difference between, on the one hand, the judgement and appreciation of art and on the other, the judgement and appreciation of all the other things in which we take an aesthetic interest. For only by acknowledging this contrast can one do justice to the importance regularly ascribed to art. The contrast is explained by appealing to an occasion-sensitive account of understanding drawn from Charles Travis, directly but with Gordon Baker and

Wittgenstein as also proximate rather than remote On this basis it argues first that we need to offer accounts of key topics only as far as questions might be raised in respect of them hence not exceptionlessly and second that we should therefore defend the view that the meaning of artworks can be changed by later events the historical character of art or forward retroactivism and that art has an institutional character understood broadly on the lines of Terry Diffey's Republic of Art Besides providing a general framework Artistic Judgement also explores the applications of the ideas to specific artworks or classes of them

Olsen, A. Pettersson, 2005-09-14 The articles in this collection focus attention on the concept of literature and on the relationship between this concept and the concepts of a literary work and a literary text Adopting an analytic approach the articles attempt to clarify how these concepts govern our thinking about the phenomenon of literature in various ways exploring the issues which arise when these concepts are employed as theoretical instruments for describing and analyzing the phenomenon of literature

Music and the Modern Condition: Investigating the Boundaries Ljubica Ilic, 2016-04-29 Two crucial moments in the formation and disintegration of musical modernity and the musical canon occurred at the turn of the seventeenth and the first half of the twentieth century Dr Ljubica Ilic provides a fresh and close look at these moments exploring the ways musical compositions shift to and away from ideological structures identified with modernity The focus is on European art music whose grand narrative defined by tonality and teleological development begins in the seventeenth century and ends with twentieth century modernisms This particular musical language game coincides with historical changes in the phenomenological understanding of space and selfhood A key concept of the book concerns musical compositions that remain without proper conclusions if the wholesome musical work is a manifestation of wholesome subjectivity the pieces Ilic explores deny it reflecting conflict of the individual with previous beliefs with contexts and even within the self as the basic modern condition The musical work is in this case still bounded and well defined but fractured by the incapability or refusal to satisfactorily conclude the implicit cut forced upon it changes the expected musical flow or speaking in spatial terms it influences the musical form By using the metaphor of space Ilic explores how the existence of a separate self as a primary feature of Western modernity becomes negotiated through awareness of the subject's own independence and individuality innerness as something entirely separate from its surroundings and the collective space of social interaction Seeing musical storytelling as a metaphoric representation of selfhood and modernity as a historical continuum Ilic examines the boundaries and relationships between the musical work
