The Organizational State Social Choice In National Policy Domains:

The Organizational State Edward O. Laumann, David Knoke, 1987 The Federal Government in the United States is a government of the people by the people and for the people Presidents are elected by popular vote in the nation filtered through the electoral college Senators are elected by popular vote in their states and Representatives are elected by popular vote in their Congressional districts Cabinet members and agency heads are appointed by the elected president as are members of the Supreme Court But this says nothing about politics Professor Laumann and Knoke have asked in this book how policies were made in the period 1977-1980 in the areas of energy and health The question is a very different one from the question of how the positions of president and Congress are filled

Corporate Social Capital and Liability Roger Th.A.J. Leenders, Shaul M. Gabbay, 2013-03-09 In studies of inter organizational relations IORs there is a tendency to look at dyads of firms and to consider networks as aggregates of such dyads. But there are several roles for a third party to go between. This chapter looks at a go between not in the sense of a middleman who intermediates in existing production or trade such as an agent, wholesaler, retailer, and not in the sense of an entrepreneur who intermediates in the realization of new potential in connecting supply and demand. It looks at a go between in the sense of a relationship counsellor for the development and maintenance of social capital, providing support in setting up, adapting, and ending cooperative relations between others. Or, in yet different terms, to help in the embedding of relations in Granovetter's 1985 sense (Uzzi 1997a). Such roles may be performed by middlemen or entrepreneurs but also by specialized agents who do not play a direct role in linking stages in a chain of production and distribution as middlemen and entrepreneurs typically do. Indeed, some of the roles require an independence that is served by not having a direct stake in the relations that need to be developed. I propose that the analysis yields a perspective for looking at the roles of trade and industry associations in European business systems and of banks and trading houses in Japanese enterprise groups (Kigyo Shudan).

The Not-So-Special Interests Matt Grossmann, 2012-04-11 Lobbyist tends to be used as a dirty word in politics. Indeed, during the 2008 presidential primary campaign, Hillary Clinton was derided for even suggesting that some lobbyists represent real Americans. But although many popular commentators position interest groups as representatives of special, not public interests, much organized advocacy is designed to advance public interests and ideas. Advocacy organizations more than 1,600 of them are now an important component of national political institutions. This book uses original data to explain why certain public groups such as Jews, lawyers, and gun owners develop substantially more representation than others and why certain organizations become the presumed spokespersons for these groups in government and media. In contrast to established theory and conventional wisdom, this book demonstrates that groups of all sizes and types generate advocates to speak on their behalf, though with varying levels of success. Matt Grossmann finds that the advantages of organized representation accrue to those public groups that are the most politically motivated and involved in their communities. Organizations that mobilize members and create a long-lasting presence in Washington become, in the minds of policymakers and reporters, the taken-for-granted surrogates for these public groups. In the face of perennial debates about the relative power of the people and the special interests, Grossmann offers an informed and nuanced view of the role of organizations in public representation and American governance.

Civil Societies and Social Movements Derrick Purdue, 2007-04-23 This volume examines and contributes to debates surrounding social capital, social movements, and the role of civil society in emerging forms of governance. The authors adopt a broad range of research approaches from testing hypotheses drawn from rational choice theory against available statistics on associations to ethnographic study of emerging attempts at participant deliberative democracy. Divided into three clear sections focusing on the following core aspects of civil society: the position of

civic organizations between state and society in emerging forms of governance the geographical scales of social movement mobilizations and actions from the local to the global the patterns of public trust and civic engagement that falls under the rubric of social capital The book draws on case studies from a wide range of countries including Russia Ukraine Britain Greece Spain Germany Argentina and new Asian democracies Presenting current research on the key dimensions of civil society Civil Societies and Social Movements will appeal to those researching and studying in the fields of political science sociology and social policy

The Rise of Interactive Governance and Quasi-Markets S.A. Denters, Oscar van Heffen, J. Huisman, P.J. Klok, 2013-06-29 It has taken a long time to make this book Many initial drafts of the chapters published in this book were presented in November 2000 during a two day conference on Interactive governance towards a post parliamentary democracy held in Enschede The Netherlands The Netherlands Institute of Governance NIG sponsored the conference After this conference the organisers discussed the possibility of making a book on the basis of papers presented at this event In the end it was agreed that such a publication would indeed be worthwhile provided the initial papers were fundamentally revised Moreover it was agreed that also supplementary chapters should be included in order to strengthen the international comparative perspective On this basis authors of the conference papers chapters and envisioned new chapters were invited to re submit drafts The completion of the book however was unexpectedly halted by the tragic sudden death of our co editor and dear friend Oscar van Heffen In his lifetime he was the driving force behind this project Without his efforts insightful comments and helpful suggestions this book in its present form would never have been published As such we dedicate this volume to his memory the completion of the book being an honorary debt to our friend and his wife Mirjan
