Cosmic Womb Chandra Wickramasinghe, Ph.D., Robert Bauval, 2017-12-19 Compelling evidence that life intelligence and evolution on Earth were seeded by comets and cosmic intelligence Explains how life first came from interstellar dust and comets and how later arrivals of cosmic dust and comets spurred evolution Explores the possibility that universal knowledge may be stored in human DNA and how ancient cultures may have known a way to retrieve this knowledge Reveals new discoveries about the dimensions of the Great Pyramid of Giza All ancient cultures link humanity's origins to the heavens The Egyptians for example were adamant that their ancestors came from the stars of Orion and Sirius Today however religion and science assert that life arose spontaneously here on Earth Did the ancients know our true cosmic origins Have they left us clues Expanding on the panspermia theory developed with the celebrated astronomer Sir Fred Hoyle namely that the building blocks of life were imported to Earth by comets in the distant past Chandra Wickramasinghe and Robert Bauval explore the latest findings in support of a cosmic origin for humanity They detail the astrobiological discoveries of organic molecules deep in space how microbes are incredibly resistant to the harshest conditions of space enabling the transfer of genes from one star system to another and the recent recovery of microorganisms from comets still in space They argue that the universe was born and preset with the blueprint of life and that the cosmos must be teeming with lifeforms far older and perhaps far more developed than us They show how life arrived on our planet in the form of interstellar dust containing alien bacteria approximately 3.8 billion years ago and how later comets meteoroids and asteroids brought new bacterial and viral genetic material which was vital for evolution Using the latest advances in physics cosmology and neuroscience the authors explore how universal knowledge may be stored in human DNA and cells and they postulate that ancient cultures such as the pyramid builders of Egypt and the temple builders of India may have known a way to retrieve this knowledge Sharing new discoveries from experienced architects engineers and mathematicians they show how the Great Pyramid is a three dimensional mathematical equation in stone bearing a potent message for humanity across time and space about who we are and where we come from Ancient Astronomy Clive L.N. Exploring Archaeoastronomy Liz Henty,2022-03-24 Archaeoastronomy and archaeology are two distinct fields of study which examine the cultural aspect of societies but from different perspectives Archaeoastronomy seeks to discover how the impact of the skyscape is materialized in culture by alignments to celestial events or sky based symbolism yet by contrast archaeology s approach examines all aspects of culture but rarely considers the sky Despite this omission archaeology is the dominant discipline while archaeoastronomy is relegated to the sidelines The reasons for archaeoastronomy s marginalized status may be found by assessing its history For such an exploration to be useful archaeoastronomy cannot just be investigated in a vacuum but must be contextualized by exploring other contemporaneous developments particularly in archaeology On the periphery of both there are various strands of esoteric thought and pseudoscientific theories which paint an alternative view of monumental remains and these also play a part in the background The discipline of archaeology has had an unbroken lineage from the late 19th century to the present On the other hand archaeoastronomy has not been consistently titled having adopted various different names such as alignment studies orientation theory astro archaeology megalithic science archaeotopography archaeoastronomy and cultural astronomy names which depict variants of its methods

and theory sometimes in tandem with those of archaeology and sometimes in opposition Similarly its academic status has always been unclear so to bring it closer to archaeology there was a proposal in 2015 to integrate archaeoastronomy research with that of archaeology and call it skyscape archaeology This volume will examine how all these different variants came about and consider archaeoastronomy's often troubled relationship with archaeology and its appropriation by esotericism to shed light on its position today Archaeological Fantasies Garrett G. by which we live He also calls into question the self aggrandizing notion that humanity can and will conquer all and injects our strident confidence in science with a healthy dose of humility and wonder Filled with poetic observation and profound questions The Night Sky is a brilliant reflection of humanity s relationship with the cosmos a relationship fed by longing doubt and awe
