*Sámi Media and Indigenous Agency in the Arctic North* Coppélie Cocq Gelfgren, Thomas A. DuBois, 2020-01-09 Digital media GIFs films TED Talks tweets and more

have become integral to daily life and unsurprisingly to Indigenous people's strategies for addressing the historical and ongoing effects of colonization. In *Sami Media and Indigenous Agency in the Arctic North* Thomas DuBois and Copp lie Cocq examine how Sami people of Norway, Finland, and Sweden use media to advance a social, cultural, and political agenda anchored in notions of cultural continuity and self-determination. Beginning in the 1970s, Sami have used Sami language media including commercially produced musical recordings, feature and documentary films, books of literature and poetry, and magazines to communicate a sense of identity both within the Sami community and within broader Nordic and international arenas. In more contemporary contexts, from YouTube music videos that combine rock and joik, a traditional Sami musical genre, to Twitter hashtags that publicize protests against mining projects in Sami lands, Sami activists, artists, and cultural workers have used the media to undo layers of ignorance surrounding Sami livelihoods and rights to self-determination. Downloadable songs, music festivals, films, videos, social media posts, images, and tweets are just some of the diverse media through which Sami activists transform how Nordic majority populations view and understand Sami minority communities and more globally how modern states regard and treat Indigenous populations.

**Indigenous Rights in Modern Landscapes**  
Lars Elenius, Christina Allard, Camilla Sandström, 2016-11-10. This book examines the diverse use of Indigenous customary rights in modern landscapes from a multidisciplinary perspective. Divided into two parts, the first deals explicitly with Sami customary rights in relation to nature conservation in the Nordic countries and Russia from a legal and historical perspective. The authors investigate how longstanding Sami customary territorial rights have been reassessed in the context of new kinds of legislation regarding Indigenous people. They also look at the ideas behind the historical models of nature conservation. The second part deals with the ideas and implementation of new kinds of postcolonial models of nature conservation. The case of the Sami is compared with other Indigenous people internationally, with cases from Australia, New Zealand, Canada, and India. The work investigates how the governance of protected areas has been influenced by the principles of equality and positive discrimination and how it has affected the possibilities of establishing adaptive co-management arrangements for specific areas. How the legal situation of Indigenous peoples has been recognised in an international context is also investigated. The volume provides a multidisciplinary analysis of how the customary livelihood of Indigenous people has adapted to modern industrialised landscapes and also how postcolonial approaches have contributed to global changes of Indigenous rights and nature conservation models.

**Aspects of Altaic Civilization III**

The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as

containing dark and disturbing elements To compliment these new essays the collection features significant scholarship and commentary on The Comedy of Errors that is published in obscure and difficulty accessible journals newspapers and other sources This collection brings together these essays for the first time *The Appropriation of Nature* Tim Ingold,1987

The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers Vicki Cummings, Peter Jordan, Marek Zvelebil,2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity *FF*

*Communications* ,1971 **Making One's Way in the World** Martin Bell,2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From

the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life

*Encountering the North* Frank Möller, Samu Pehkonen, 2018-02-06 This title was first published in 2003 This volume is concerned with the European north above the Arctic Circle and its representations in Cultural Geography and International Relations The chapters in the book deal with cultural geographical and political imaginations of northern peoples and landscapes Emphasis is placed on the triangle of and interrelationship between culture geography and politics The historical and contemporary variations of meaning assigned to the north point to real processes which need to be studied in their own right To achieve this aim the book does not plainly specify the sites and levels of discourses be they academic political or popular but it does take into account the material circumstances making the context of the European north Illustrated by a coherent set of specially written case studies the volume explores issues such as history literature gender folk culture pictorial representations environment and climate change and links these issues with the geo politics of the region

*Publications of Turku University Library*, 1948 **About the Hearth** David G. Anderson, Robert P. Wishart, Virginie Vaté, 2013-08-01 Due to changing climates and demographics questions of policy in the circumpolar north have focused attention on the very structures that people call home Dwellings lie at the heart of many forms of negotiation Based on years of in depth research this book presents and analyzes how the people of the circumpolar regions conceive build memorialize and live in their dwellings This book seeks to set a new standard for interdisciplinary work within the humanities and social sciences and includes anthropological work on vernacular architecture environmental anthropology household archaeology and demographics

Knut Odner,1992 *The Varanger Saami* is a narrative of 700 years of history of a small group of Saami Lapps who live near the base of the Varangerfjord in north east Norway Dramatic social and economic changes occurred in this area during this period Once targeted for taxation by Norway Sweden and Russia the Varanger Saami became part of the kingdom of Norway in 1613 Once exclusively hunters and fisherman the Saami splintered in the 18th century into two groups the majority turned to cattle raising and commercialized fishing while a minority became full time reindeer pastoralists Habitation patterns also underwent radical change from large camps in the middle ages to increasingly nuclear settlement patterns in the 17th century Knut Odner attributes this process of dynamic change to the ideology of self reliance among the Saami      *Man*
