The Slaves' Economy Ira Berlin, Philip D. Morgan, 2016-01-20 Slaves achieved a degree of economic independence producing food tending cash crops raising livestock manufacturing furnished goods marketing their own products consuming and saving the proceeds and bequeathing property to their descendants The editors of this volume contend that the legacy of slavery cannot be understood without a full appreciation of the slaves economy

Economic Growth and the Ending of the Transatlantic Slave Trade David Eltis, 1987-06-11 This watershed study is the first to consider in concrete terms the consequences of Britain's abolition of the Atlantic slave trade Why did Britain pull out of the slave trade just when it was becoming important for the world economy and the demand for labor around the world was high Caught between the incentives offered by the world economy for continuing trade at full tilt and the ideological and political pressures from its domestic abolitionist movement Britain chose to withdraw believing in part that freed slaves would work for low pay which in turn would lead to greater and cheaper products In a provocative new thesis historian David Eltis here contends that this move did not bolster the British economy rather it vastly hindered economic expansion as the empire's control of the slave trade and its great reliance on slave labor had played a major role in its rise to world economic dominance Thus for sixty years after Britain pulled out the slave economies of Africa and the Americas flourished and these

powers became the dominant exporters in many markets formerly controlled by Britain Addressing still volatile issues arising from the clash between economic and ideological goals this global study illustrates how British abolitionism changed the tide of economic and human history on three continents *Jamaica in Slavery and Freedom* Kathleen E. A. Monteith, Glen Richards, 2002 Jamaica's rich history has been the subject of many books articles and papers This collection of eighteen original essays considers aspects of Jamaican history not covered in more general histories of the island and illuminates more recent developments in Jamaican and West Indian history Unique in its interdisciplinary approach the collection emphasizes the relevance of history to everyday life and the development of a national identity culture and economy The essays are organized in three sections Historiography and Sources Society Culture and Heritage and Economy Labour and Politics with contributions from scholars in the Departments of History Literatures in English and Political Sciences and from the Main Library University of the West Indies Mona Jamaica Book Jacket **Slavery and the Economy of São Paulo,**

1750-1850 Francisco Vidal Luna, Herbert S. Klein, 2003 A history of the society and economy of Sao Paulo from its origins to the introduction of coffee in the mid 19th century *Slave Families and the Hato Economy in Puerto Rico* David M. Stark, 2017-05-24 Scholarship on slavery in the Caribbean frequently emphasizes sugar and tobacco production but this unique work illustrates the importance of the region's hato economy a combination of livestock ranching foodstuff cultivation and timber harvesting on the living patterns among slave communities David Stark makes use of extensive Catholic parish records to provide a comprehensive examination of slavery in Puerto Rico and across the Spanish Caribbean He reconstructs slave families to examine incidences of marriage as well as birth and death rates The result are never before analyzed details on how many enslaved Africans came to Puerto Rico where they came from and how their populations grew through natural increase Stark convincingly argues that when animal husbandry drove much of the island's economy slavery was less harsh than in better known plantation regimes geared toward crop cultivation Slaves in the hato economy experienced more favorable conditions for family formation relatively relaxed work regimes higher fertility rates and lower mortality rates

Slavery and the Enlightenment in the British Atlantic, 1750-1807 Justin Roberts, 2013-07-08 This book examines the daily details of slave work routines and plantation agriculture in the eighteenth century British Atlantic focusing on case studies of large plantations in Barbados Jamaica and Virginia Work was the most important factor in the slaves experience of the institution Slaves day to day work routines were shaped by plantation management strategies that drew on broader pan Atlantic intellectual and cultural principles Although scholars often associate the late eighteenth century Enlightenment with the rise of notions of liberty and human rights and the dismantling of slavery this book explores the dark side of the Enlightenment for plantation slaves Many planters increased their slaves workloads and employed supervisory technologies to increase labor discipline in ways that were consistent with the process of industrialization in Europe British planters offered alternative visions of progress by embracing restrictions on freedom and seeing increasing labor discipline as central

to the project of moral and economic improvement *Cultural Heritage and Slavery* Stephan Conermann, Claudia Rauhut, Ulrike Schmieder, Michael Zeuske, 2023-11-20 In the recent cultural heritage boom community based and national identity projects are intertwined with interest in cultural tourism and sites of the memory of enslavement Questions of historical guilt and present responsibility have become a source of social conflict particularly in multicultural societies with an enslaving past This became apparent in the context of the Black Lives Matter movement in 2020 when statues of enslavers and colonizers were toppled controversial debates about streets and places named after them re ignited and the European Union apologized for slavery after the racist murder of George Floyd Related debates focus on museums on artworks acquired unjustly in societies under colonial rule the question of whether and how museums should narrate the hidden past of enslavement and colonialism including their own colonial origins with respect to narratives about presumed European supremacy and the need to establish new monuments for the enslaved their resistance and abolitionists of African descent In this volume we address this dissonant cultural heritage in Europe with a strong focus on the tangible remains of enslavement in the Atlantic space in the continent This may concern for instance the residences of royal noble and bourgeois enslavers charitable and cultural institutions universities banks and insurance companies financed by the traders and owners of enslaved Africans merchants who dealt in sugar coffee and cotton and the owners of factories who profited from exports to the African and Caribbean markets related to Atlantic slavery **Slaveholders in Jamaica** Christer Petley, 2015-10-06 Explores the social composition of the Jamaican slaveholding class during the era of the British campaign to end slavery looking at their efforts to maintain control over local society and considering how their economic cultural and military dependency on the colonial metropole meant that they were unable to avert the ending of British slavery **The Political Economy of Slavery** Eugene D. Genovese, 2012-01-01 This classic study of antebellum Southern society demonstrates how slavery was the bedrock of the region's social order and cultural identity In *The Political Economy of Slavery* Eugene Genovese argues that slavery gave the South a distinct class structure political community economy ideology and a set of psychological patterns As a result the South grew away from the rest of the nation and became increasingly unstable during the nineteenth century The difficulties it faced economic political moral and ideological constituted a fundamental antagonism between modern and premodern worlds Southern slavery was the foundation on which rose a powerful social class which in turn dominated Southern society While they constituted only a tiny portion of the white population they were powerful enough to largely succeed at building a new or rather rebuilding an old civilization **Contours of the World Economy 1-2030 AD** Angus Maddison, 2007-09-20 This book seeks to identify the forces which explain how and why some parts of the world have grown rich and others have lagged behind Encompassing 2000 years of history part 1 begins with the Roman Empire and explores the key factors that have influenced economic development in Africa Asia the Americas and Europe Part 2 covers the development of macroeconomic tools of analysis from the 17th century to the present Part 3 looks

to the future and considers what the shape of the world economy might be in 2030 Combining both the close quantitative analysis for which Professor Maddison is famous with a more qualitative approach that takes into account the complexity of the forces at work this book provides students and all interested readers with a totally fascinating overview of world economic history Professor Maddison has the unique ability to synthesise vast amounts of information into a clear narrative flow that entertains as well as informs making this text an invaluable resource for all students and scholars and anyone interested in trying to understand why some parts of the World are so much richer than others

Slavery and American Economic Development Gavin Wright, 2006-10-01 Slavery and American Economic Development is a small book with a big interpretative punch It is one of those rare books about a familiar subject that manages to seem fresh and new Charles B Dew Journal of Interdisciplinary History A stunning reinterpretation of southern economic history and what is perhaps the most important book in the field since Time on the Cross I frequently found myself forced to rethink long held positions Russell R Menard Civil War History Through an analysis of slavery as an economic institution Gavin Wright presents an innovative look at the economic divergence between North and South in the antebellum era He draws a distinction between slavery as a form of work organization the aspect that has dominated historical debates and slavery as a set of property rights Slave based commerce remained central to the eighteenth century rise of the Atlantic

economy not because slave plantations were superior as a method of organizing production but because slaves could be put to work on sugar plantations that could not have attracted free labor on economically viable terms Gavin Wright is William Robertson Coe Professor in American Economic History at Stanford University and the author of *The Political Economy of the Cotton South* and *Old South New South* Revolutions in the Southern Economy since the Civil War winner of the Frank L and Harriet C Owsley Award of the Southern Historical Association He has served as president of the Economic History Association and the Agricultural History Society
