emanating from the individual And yet as the coronavirus pandemic has made clear humans are unavoidably interconnected not only with other humans but with nonhuman and more than human others with whom we share space and time Why do so many of us humans avoid deny or resist a view of the world where our lives are made possible maybe even made richer through connection In this volume we suggest a view of communication as intimacy We use this concept as a provocation for thinking about how we humans are in an always already state of being in relation with other humans nonhumans and the land
