That Noble Cabinet History Of British Mu:

That Noble Cabinet Edward Miller,1974 *That Noble Cabinet* Edward Miller,1973 **Museums in Motion** Edward P. Alexander,Mary Alexander,2008 In 1979 Edward P Alexander s *Museums in Motion* was hailed as a much needed addition to the museum literature In combining the history of museums since the eighteenth century with a detailed examination of the function of museums and museum workers in modern society it served as an essential resource for those seeking to enter to the museum profession and for established professionals looking for an expanded understanding of their own discipline Now Mary Alexander has produced a newly revised edition of the classic text bringing it the twenty first century with coverage of emerging trends resources and challenges New material also includes a discussion of the children s museum as a distinct type of institution and an exploration of the role computers play in both outreach and traditional in person visits

That Noble Cabinet ,1973 **The ^AOxford Handbook of History and Material Culture** Ivan Gaskell,Sarah Anne Carter,2020-04-07 Most historians rely principally on written sources Yet there are other traces of the past available to historians the material things that people have chosen made and used This book examines how material culture can enhance historians understanding of the past both worldwide and across time Deploying material culture to discover the pasts of constituencies who have left few traces in written record the authors present familiar historical problems in new ways This volume offers case studies arranged thematically in six sections that address the relationship of history and material culture to cognition technology the symbolic social distinction and memory **Exposing Electronics** Bernard Finn,2000-12-21 It is clear that artifacts have the power to provoke thought inspire action and arouse passions There is evidence of this in the ever increasing number of museums as well as in the ability of those museums to stimulate controversy through exhibits As a consequence much has been written analyzing the interaction between objects and museum visitors Less well recognized or understood is the value of objects for historical research In this series of books we propose to show by example how artifacts can be employed in the study of the history of science and technology in ways ranging from motivating a line of research to providing hard evidence in the solution of an otherwise insoluble problem The first volume focused on medicine in this the second volume the topic our authors address is electronics As readers will discover there is considerable scope in the range of topics and in the range of uses of artifacts There is also a section that suggests to readers what kind of questions they might consider when they visit electrical exhibits and where those exhibits are to be found This series is sponsored by the Deutsches Museum in Munich the Science Museum in London and the Smithsonian Institution in Washington with help from professional historians in other museums and elsewhere *Keeping Their Marbles* Tiffany Jenkins,2018 The story of how the museums of the West acquired their fabulous collections from the Benin Bronzes to Native American sacred objects and why they should not be returned to the lands or the people from which they came Culture, Education and the State Michael Stephens,2019-08-13 First published in 1988 this book is built around the trio of interrelated themes of The State

Culture and Education The essays look at a variety of institutions including the BBC The British Library and the Arts Council and discuss the educational roles that they adopt and how they set the national cultural agenda They also explor Life on Display Karen A. Rader,Victoria E.M. Cain,2014-10-03 Rich with archival detail and compelling characters Life on Display uses the history of biological exhibitions to analyze museums shifting roles in twentieth century American science and society Karen A Rader and Victoria E M Cain chronicle profound changes in these exhibitions and the institutions that housed them between 1910 and 1990 ultimately offering new perspectives on the history of museums science and science education Rader and Cain explain why science and natural history museums began to welcome new audiences between the 1900s and the 1920s and chronicle the turmoil that resulted from the introduction of new kinds of biological displays They describe how these displays of life changed dramatically once again in the 1930s and 1940s as museums negotiated changing often conflicting interests of scientists educators and visitors The authors then reveal how museum staffs facing intense public and scientific scrutiny experimented with wildly different definitions of life science and life science education from the 1950s through the 1980s The book concludes with a discussion of the influence that corporate sponsorship and blockbuster economics wielded over science and natural history museums in the century s last decades A vivid entertaining study of the ways science and natural history museums shaped and were shaped by understandings of science and public education in the twentieth century United States Life on Display will appeal to historians sociologists and ethnographers of American science and culture as well as museum practitioners and general readers **Victorian Bloomsbury** Rosemary Ashton,2012-09-14 While Bloomsbury is now associated with Virginia Woolf and her early twentieth century circle of writers and artists the neighborhood was originally the undisputed intellectual quarter of nineteenth century London Drawing on a wealth of untapped archival resources Rosemary Ashton brings to life the educational medical and social reformists who lived and worked in Victorian Bloomsbury and who led crusades for education emancipation and health for all Ashton explores the secular impetus behind these reforms and the humanitarian and egalitarian character of nineteenth century Bloomsbury Thackeray and Dickens jostle with less famous characters like Henry Brougham and Mary Ward Embracing the high life of the squares the nonconformity of churches the parades of shops schools hospitals and poor homes this is a major contribution to the history of nineteenth century London
