Overcoming Religious Illiteracy D. Moore, 2007-10-02 In *Overcoming Religious Illiteracy* Harvard professor and Phillips Academy teacher Diane L Moore argues that though the United States is one of the most religiously diverse nations in the world the vast majority of citizens are woefully ignorant about religion itself and the basic tenets of the world s major religious traditions The consequences of this religious illiteracy are profound and include fueling the culture wars curtailing historical understanding and promoting religious and racial bigotry In this volume Moore combines theory with practice to articulate how to incorporate the study of religion into the schools in ways that will invigorate classrooms and enhance democratic discourse in the public sphere

[The Republican War on Science](#) Chris Mooney, 2007-03-16 Science has never been more crucial to deciding the political issues facing the country Yet science and scientists have less influence with the

federal government than at any time since the Eisenhower administration In the White House and Congress today findings are reported in a politicized manner spun or distorted to fit the speaker s agenda or when they re too inconvenient ignored entirely On a broad array of issues stem cell research climate change missile defense abstinence education product safety environmental regulation and many others the Bush administration s positions fly in the face of overwhelming scientific consensus Federal science agencies once fiercely independent under both Republican and Democratic presidents are increasingly staffed by political appointees and fringe theorists who know industry lobbyists and evangelical activists far better than they know the science This is not unique to the Bush administration but it is largely a Republican phenomenon born of a conservative dislike of environmental health and safety regulation and at the extremes of evolution and legalized abortion In *The Republican War on Science* Chris Mooney ties together the disparate strands of the attack on science into a compelling and frightening account of our government s increasing unwillingness to distinguish between legitimate research and ideologically driven pseudoscience *Critical Literacy* Eugene F. Provenzo, Michael W. Apple, 2015-12-03 In *Critical Literacy* Eugene F. Provenzo Jr challenges E. D. Hirsch s assumptions about culture and education Calling for a broader and more democratic vision than Hirsch Provenzo critiques Hirsch s legacy up through the current conservative educational agenda for education which he argues denies not only the United States diversity but its democratic traditions of democratic participation His book shows why critical faculties and skills of students are essential not only to the success of individual students but to their participation in a healthy democracy Provenzo offers a list of 5 000 things every educated American ought to know none of them the same items as those included on Hirsch s list in *Cultural Literacy* *Critical Literacy* is essential reading for those concerned with our schools and the future of our children **Crusade in the Classroom** Douglas B. Reeves, 2001 Accountability Standards Choice Readiness You ve heard the buzzwords of school reform You ve heard the campaign promises Now as these policies are being put into action with the new administration it s time to ask How will these changes affect you What impact will annual testing have on your child How will federal funding reforms affect your child s school How should you interpret the school report cards that rate schools based on test scores How will you know which options are right for your child How will gifted children and students with learning disabilities be affected In clear jargon free language Dr Douglas Reeves explains the Bush policies for school reform predicts how these new programs will change our schools and helps parents understand their options Throughout this practical guide profiles of Innovators to Watch illustrate how early tests of these policies have played out in schools across the country *The Rise of Common-Sense Conservatism* Antti Lepistö, 2021-04-20 In the years following the election of Donald Trump a victory that hinged on the votes of white Midwesterners who were both geographically and culturally distant from the media s coastal concentrations there has been a flurry of investigation into the politics of the so called common man The notion that the salt of the earth purity implied by this appellation is best understood by conservative politicians is no recent development though

As Antti Lepist shows in his timely and erudite book the intellectual wellsprings of conservative common sense discourse are both older and more transnational than has been thought In considering the luminaries of American neoconservative thought among them Irving Kristol Gertrude Himmelfarb James Q Wilson and Francis Fukuyama Lepist argues that the centrality of their conception of the common man accounts for the enduring power and influence of their thought Intriguingly Lepist locates the roots of this conception in the eighteenth century Scottish Enlightenment revealing how leading neoconservatives weaponized the ideas of Adam Smith Thomas Reid and David Hume to denounce postwar liberal elites educational authorities and social reformers Their reconfiguration of Scottish Enlightenment ideas ultimately gave rise to a defining force in modern conservative politics the common sense of the common man Whether twenty first century politicians who invoke the grievances of the people are conscious of this unusual lineage or not Lepist explains both the persistence of the trope and the complicity of some conservative thinkers with the Trump regime *Schooling, Childhood, and Bureaucracy* T.

Waters,2012-09-24 In exploring the relationship between bureaucratic schooling and the individual child Waters describes the persistence of educational inequality child development and the nature of bureaucracy The conclusions point out how education bureaucracies frame both schooling and childhood as they relentlessly seek to create ever more perfect children
