Faces of Power Andrew Stewart, 1993 During his reign and following his death the physiognomy of Alexander the Great was one of the most famous in history adorning numerous works of art This study demonstrates how the various portraits transmit not so much a likeness of Alexander as a set of clichés that symbolized the ruler *Letter and Report on the Discoveries at Herculaneum* Johann Joachim Winckelmann, 2011 This new translation brings to light the early

days of scientific archaeology and the unearthing and study of Herculaneum and Pompeii as observed by the erudite and acerbic art historian Johann Joachim Winckelmann 1717 1768 His Letter published in German in 1762 displays his extensive knowledge of geology ancient literature and art while offering a scathing critique of the Spanish Bourbon excavations around the Bay of Naples and of the officials involved He further discusses these topics in his equally controversial Report of 1764 The introduction describes the context in which these texts were written identifies various politicians academics and collectors and elucidates topics of particular interest to Winckelmann from artifacts to local customs to the contents of ancient papyri The illustrations particularly those from the Bourbon publication *Le Antichit di Ercolano* 1757 92 illuminate how these monuments influenced contemporary perception of the ancient world

Ancient Greek Portrait Sculpture Sheila Dillon, 2006-04-24 This book offers a new approach to the history of Greek portraiture by focusing on portraits without names Comprehensively illustrated it brings together a wide range of evidence that has never before been studied as a group Sheila Dillon considers the few original bronze and marble portrait statues preserved from the Classical and Hellenistic periods together with the large number of Greek portraits known only through Roman copies In focusing on a series of images that have previously been ignored Dillon investigates the range of strategies and modes utilized in these portraits to construct their subject's identity Her methods undermine two basic tenets of Greek portraiture first that it was only in the late Hellenistic period under Roman influence that Greek portraits exhibited a wide range of styles including descriptive realism and second that in most cases one can easily tell a subject's public role that is whether he is a philosopher or an orator from the visual traits used in this portrait The sculptures studied here instead show that the proliferation of portrait styles takes place much earlier in the late Classical period and that the identity encoded in these portraits is much more complex and layered than has previously been realized Despite the fact that these portraits lack the one feature most prized by scholars of ancient portraiture a name they are evidence of utmost importance for the history of Greek portraiture

Classical Bronzes Carol C. Mattusch, 2019-04-15 One of the world's leading authorities on ancient bronze sculpture Carol C Mattusch urges us to discard the terms Greek original and Roman copy and to adopt instead terms that distinguish unique works from those produced in series and those produced as variations on a theme She discusses the dating of bronzes based on criteria of technique and style and considers technical innovations in the art of portraiture Most controversially she offers evidence that Greek artists cast bronzes in series based on a single model Mattusch points out that examples of series castings can be found among the statuettes and vessel attachments from the Geometric and Orientalizing periods From the Classical period onward statues also appear to have been cast in series Certain styles and types of images that achieved widespread popularity during the Hellenistic and Roman periods were produced in large quantities and in several different places This book will raise important new questions in the field of Classical bronze sculpture How long might a single model remain in use and how far might casts from it be transported for production What is the significance of an artist's signature on a work in a series and what influence was wielded by the potential buyer And given these issues what should the criteria be for distinguishing Greek works from Roman ones Classical Bronzes is generously illustrated including an eight page color insert

Creating Material Worlds Louisa Campbell, Adrian Maldonado, Elizabeth Pierce, Anthony Russell, 2016-05-07 Despite a growing literature on identity theory in the last two decades much of its current use in archaeology is still driven toward locating and dating static categories such as Phoenician Christian or native Previous studies have highlighted the various problems and challenges presented by identity with the overall effect of deconstructing it to insignificance As the humanities and social sciences turn to material culture archaeology provides a unique perspective on the interaction between people and things over the long term This volume argues that identity is worth studying not despite its slippery nature but because of it Identity can be seen as an emergent property of living in a material world an

ongoing process of becoming which archaeologists are particularly well suited to study The geographic and temporal scale of the papers included is purposefully broad to demonstrate the variety of ways in which archaeology is redefining identity Research areas span from the Great Lakes to the Mediterranean with case studies from the Mesolithic to the contemporary world by emerging voices in the field The volume contains a critical review of theories of identity by the editors as well as a response and afterward by A Bernard Knapp **Hellenistic Pottery: Text** Susan I.
