Experimental Biology
Shrewsbury, Massachusetts

In the last two decades, research in sleep has greatly accelerated. With the present volume, oriented toward the neurophysiologists, neuropharmacologists, neurologists, and behavioralists, the author addressed himself to those who welcome some guidelines to find their way around in today's "hypooplethora." He has endeavored to prepare a background for students of the sleep problem by citing and discussing the relevant recent, and the more pertinent older literature. With its emphasis on organizational aspects, with its often speculative flavor and with the manifold questions it raises, the book is also addressed to the active sleep investigator.

Human Physiology R.F. Schmidt,G. Thews,2013-11-11 Human Physiology is the English version of a time honored German textbook first published by HERMANN REIN in 1936 We undertook the preparation of a completely revised 20th edition with the intention of making the book accessible to a wide range of English speaking readers The subject matter was therefore organized so as to correspond to the structuring of physiology courses in most countries of the world The book is directed primarily at students of medicine Its aim is to enable them to understand living processes in the human organism providing the basis for the scientific understanding of pathological changes The material was chosen to give the reader not only the knowledge required for passing examinations but also information necessary for a subsequent professional career For this reason special attention was devoted to pathophysiological aspects We hope that the book will prove a useful reference on the present status of physiology for physicians in private and hospital practice as well as for its primary readership The book should also serve biologists biochemists pharmacologists pharmacists and psychologist as a source of information on the physiological principles underlying their disciplines

Biological Rhythms in Psychiatry and Medicine Gay Gaer Luce,National Institute of Mental Health (U.S.),1970 *Stress and Performance Effectiveness* Earl A. Alluisi,Edwin A. Fleishman,2013-10-28 First published in 1982 This is Volume III of a three volume series and focuses on stress and performance effectiveness This series of volumes reviews the state of the art in several areas of human performance research These areas are human capability assessment information processing and decision making and job stress It was recognized that these have been active research areas but work in these areas has not previously been linked directly to national concerns about productivity The focus is on implications for improving productivity and for recommending research in these areas that should have impact on productivity
