Mueller, 2014-08-20 The Logical Foundations of Social Theory describes Gert Mueller's argument that physical biological social moral and cultural reality form an asymmetrical hierarchy of founding and controlling relationships that condition social reality rather than mechanically determining it This book analyzes social stratification as labor wealth and power the moral order as solidarity ideology and morality and culture systems as art science and religion **The Phantom of the Ego** Nidesh Lawtoo, 2013-10-01 The Phantom of the Ego is the first comparative study that shows how the modernist account of the unconscious anticipates contemporary discoveries about the importance of mimesis in the formation of subjectivity Rather than beginning with Sigmund Freud as the father of modernism Nidesh Lawtoo starts with Friedrich Nietzsche's antimetaphysical diagnostic of the ego his realization that mimetic reflexes from sympathy to hypnosis to contagion to crowd

behavior move the soul and his insistence that psychology informs philosophical reflection Through a transdisciplinary comparative reading of landmark modernist authors like Nietzsche Joseph Conrad D H Lawrence and Georges Bataille Lawtoo shows that before being a timely empirical discovery the mimetic unconscious emerged from an untimely current in literary and philosophical modernism This book traces the psychological ethical political and cultural implications of the realization that the modern ego is born out of the spirit of imitation it is thus strictly speaking not an ego but what Nietzsche calls a phantom of the ego The Phantom of the Ego opens up a Nietzschean back door to the unconscious that has mimesis rather than dreams as its via regia and argues that the modernist account of the mimetic unconscious makes our understanding of the psyche new

Social Structure and Forms of Consciousness István Mészáros, 2011 In The Dialectic of Structure and History Volume Two of Social Structure and Forms of Consciousness Istvan Meszaros brings the comprehension of our condition and the possibility of emancipatory social action beyond the highest point reached to date Building on the indicatory flashes of conceptual lightning in the Grundrisse and other works of Karl Marx Meszaros sets out the relations of structure and agency individual and society base and superstructure nature and history in a dialectical totality open to the future The project is brought to its conclusion by means of critique an analysis that shows not only the inadequacies of the thought critiqued but at the same time their social historical cause The crucial questions are addressed through critique of the highest point of honest and brilliant thought in capital s ascending phase that of Adam Smith Kant and Hegel as well as the irrationalities and dishonesty of the apologists of the capital system s descending phase such as Hayek and Popper The dead ends of both Levi Strauss s structuralism and post modernism arising from their denial of history are placed in their context as capital apologetics What Meszaros the leading Marxist philosopher of our times has achieved is of world historical importance He has cleared the philosophical ground to permit the illumination of a path to transcend the destructive death spiral of the capital system

Cognition Tom Rockmore, 1997-01-01 Hegel s Phenomenology of Spirit the philosopher s first and perhaps greatest work is the most important philosophical treatise of the nineteenth century In this companion volume to his general introduction to Hegel Tom Rockmore offers a passage by passage guide to the Phenomenology for first time readers of the book and others who are not Hegel specialists Rockmore demonstrates that Hegel s concepts of spirit consciousness and reason can be treated as elements of a single coherent theory of knowledge one that remains strikingly relevant for the contemporary discussion He shows how the various conceptions of cognition developed in the text culminate in absolute knowing which Rockmore reads in opposition to the frequent religious readings of

Conceptual Foundations of Social Research Methods David Baronov, 2015-10-23 One of the common frustrations for students trying to make sense of the various debates and concepts that inform contemporary educational and social science research methods such as structuralism postpositivism hermeneutics and postmodernism is that most books introducing these topics are written at a level that assumes the reader comes to this material with a basic grasp of the underlying ideas Too often fundamental concepts and theories are presented without adequate preparation and without providing practical examples to illustrate key elements When the first edition of *Conceptual Foundations of Social Research Methods* was published it represented a sharp contrast with these other approaches and received much praise In this revised and expanded second edition David Baronov further develops his critically acclaimed treatment of the core conceptual tools of social research informing education and the social sciences updating his discussion of the current literature and adding a new chapter that explores the role of pragmatism **Features of the Second Edition**
