advantage of being quick and easy to administer it takes an average of ten minutes to perform it is reliable and applicable to both young and old It is a useful complement to traditional batteries such as the Rorschach and Draw a Family and self assessment questionnaires What makes the CHaD different is that it is a free drawing exam and one that taps one of the most highly symbolic parts of the body the hand The CHaD has been tested on normal and pathological individuals for over ten years Clear guidelines can now be set down for administration testing and interpretation Obviously a projective test can never be more sensitive than the professional who uses it but it is Davido s intention that the theoretical underpinnings and her presentations of case studies along with the drawings will help other practitioners deal better with the needs of their patients
