Morison,1889 Sermons in All Souls Monthly, 1888-1891 Richard Heber Newman,1888 **Confucianism as a World Religion** Anna Sun,2013-04-21 Is Confucianism a religion If so why do most Chinese think it isn t From ancient Confucian temples to nineteenth century archives to the testimony of people interviewed by the author throughout China over a period of more than a decade this book traces the birth and growth of the idea of Confucianism as a world religion The book begins at Oxford in the late nineteenth century when Friedrich Max M ller and James Legge classified Confucianism as a world religion in the new discourse of world religions and the emerging discipline of comparative religion Anna Sun shows how that decisive moment continues to influence the understanding of Confucianism in the contemporary world not only in the West but also in China where the politics of Confucianism has become important to the present regime in a time of transition Contested histories of Confucianism are vital signs of social and political change Sun also examines the revival of Confucianism in contemporary China and the social significance of the ritual practice of Confucian temples While the Chinese government turns to Confucianism to justify its political agenda Confucian activists have started a movement to turn Confucianism into a religion Confucianism as a world religion might have begun as a scholarly construction but are we witnessing its transformation into a social and political reality With historical analysis extensive research and thoughtful reflection Confucianism as a World Religion will engage all those interested in religion and global politics at the beginning of the Chinese century **Catalogue of Books** Perth (W.A.). Embodying the Vedas Borayin Larios, 2017-04-10. Popularly, Hinduism is believed to be the world's oldest living religion. This claim is based on a continuous reverence to the oldest strata of religious authority within the Hindu traditions: the Vedic corpus, which began to be composed more than three thousand years ago around 1750-1200 BCE. The Vedas have been considered by many as the philosophical cornerstone of the Brahmanical traditions, still even previous to the colonial construction of the concept of Hinduism. However, what can be pieced together from the Vedic texts is very different from contemporary Hindu religious practices, beliefs, social norms, and political realities. This book presents the results of a study of the traditional education and training of Brahmins through the traditional system of education called gurukula, as observed in 25 contemporary Vedic schools across the state of Maharashtra. This system of education aims to teach Brahmin males how to properly recite, memorize, and ultimately embody the Veda. This book combines insights from ethnographic and textual analysis to unravel how the recitation of the Vedic texts and the Vedic traditions, as well as the identity of the traditional Brahmin in general, are transmitted from one generation to the next in contemporary India.

The Philosophy of Enchantment R. G. Collingwood, 2005. This is the long-awaited publication of a set of writings by the British philosopher, historian, and archaeologist R. G. Collingwood on critical anthropological and cultural themes only hinted at in his previously available work. At the centre of the book are six chapters of a study of folktale and magic composed by Collingwood in the mid-1930s and intended for development into a book. Here Collingwood applies the principles of his philosophy of history to problems in the long-term evolution of human society and culture. This is preceded in Part I by a range of contextualizing material on such topics as the relations between music and poetry, the nature of language, the value of Jane Austen's novels, the philosophy of art, and the relations between aesthetic theory and artistic practice. Part III of the volume consists of two essays: one on the relationship between art and mechanized civilization and the second, written in 1931, on the collapse of human values and civilization leading up to the catastrophe of armed conflict. These offer a devastating analysis of the consequences that attend the desertion of liberal principles, indeed of all politics, as such, in the ultimate self-annihilation of military conquest. The volume opens with three substantial introductory essays by the editors, authorities in the fields of critical and literary history, social and cultural anthropology, and the philosophy of history, and the history of ideas; they provide their explanatory and contextual notes to guide the reader through the texts. *The Philosophy of Enchantment* brings hitherto unrecognized areas of Collingwood's achievement to light and demonstrates the broad range of Collingwood's intellectual engagements, their integration, and their relevance to current areas of debate in the fields of philosophy, cultural studies, social, and literary
