

SISTÉMICA ELEMENTAL DESDE UN PUNTO DE VISTA SUPERIOR

UNO

- Sistémica, una manera de pensar, hacer investigación, plantear preguntas y obtener respuestas
- La magia acontece cuando sabemos tratar algo que no podemos comprender.
- Práxis, lo que se maneja adecuadamente.
- Episteme, entender el porqué de lo que se está haciendo
- todos somos magos, pues constantemente y de manera competente hacemos cosas sin saber cómo.
- Magia= a sistémica
- La sistémica es el arte de ver, averiguar y especialmente reconocer conexiones entre las partes observadas

DOS

- A la ciencia se acude habitualmente para explicar, hacemos entender y sentir de qué cosas estamos hablando.
- hay dos maneras complementarias de producir la comprensión: una es la ciencia y la otra es la sistémica; he ahí las raíces, las relaciones etimológicas interpretadas de distintas maneras.
- los pilares fundamentales de la sistémica: La hermenéutica, la cibernética y la ética.
- el constructivismo da las bases para la noción de ética y, sin la ética, la noción de constructivismo no surgiría

TRES

- o, si es un constructivista radical, dirá: "yo construyo". El realista, en cambio, dirá que hay esto o aquello.
- es la libertad la que nos carga de responsabilidades, y sólo desde ella se puede asumir la responsabilidad de tomar la decisión.

CUATRO

- Lo que distingue la noción de cibernética es el hecho de que en ella se piensa circularmente, no linealmente.
- Causalidad, toda causa produce un efecto, y la conexión entre ambos está dada por una ley natural.

CINCO

- Teleología, aquella operación que se realiza según la causa final; mientras que la causa eficiente se orienta en concordancia con un estado actual de las cosas, en la causa final el comportamiento se orienta hacia una meta, hacia un estado futuro de las cosas.
- la noción de propósito es susceptible de un análisis.
- conclusión de la idea de la causa final; solamente se necesita saber cuál es el punto deseado y, entonces, se pueden predecir los comportamientos del sistema.

SEIS

- otras formas de trabajar con una función, por ejemplo, lo que se llama un anagrama
- que los profesores no se conviertan en "trivializadores", que utilicen el ingenio de los niños y construyan sobre él para que los niños puedan ser menos triviales.
