Brown, 2015-04-14 The Teach the Text Commentary Series utilizes the best of biblical scholarship to provide the information a pastor needs to communicate the text effectively The carefully selected preaching units and focused commentary allow pastors to quickly grasp the big idea and key themes of each passage of Scripture Each unit of the commentary includes the big idea and key themes of the passage and sections dedicated to understanding teaching and illustrating the text The newest release in this innovative commentary series is Jeannine K Brown's treatment of the Gospel of Matthew **"To Teach" in Ancient Israel** Wendy L. Widder, 2014-01-31 This book employs cognitive linguistics to determine the foundational elements of the ancient Israelites concept of teaching as reflected in the text of the Hebrew Bible and Ben Sira It analyzes four prominent lexemes that comprise a lexical set referring to the act of teaching H D H and D The study concludes that in its most basic form the

concept of teaching in ancient Israel was that a teacher creates the conditions in which learning can occur. The methodology employed in this project is built on a premise of cognitive studies namely that because teaching is a universal human activity there is a universal concept of teaching one person A recognizes that another person B lacks knowledge belief skills and the like or has incomplete or distorted knowledge etc and person A attempts to bring about a changed state of knowledge belief or skill in person B. This universal concept provides the starting place for understanding the concept of teaching that Biblical Hebrew reflects and it also forms the conceptual base against which the individual lexemes are profiled. The study incorporates a micro level analysis and a macro level analysis. At the micro level each lexeme is examined with respect to its linguistic forms the linguistic analysis and the contexts in which the lexeme occurs the conceptual analysis. The linguistic analysis considers the clausal constructions of each instantiation and determines what transitivity ditransitivity or intransitivity contributes to the meaning. Collocations of the lexeme including prepositional phrases adverbial adjuncts and parallel verbs are evaluated for their contribution to meaning. The conceptual analysis of each lexeme identifies the meaning potential of each word as well as what aspect of the meaning potential each instantiation activates. The study then determines the lexeme's prototypical meaning which is profiled on the base of the universal concept of teaching. This step of profiling represents an important adaptation of the cognitive linguistics tool of profiling to meet the special requirements of working with ancient texts in that it profiles prototype meanings not instantiations. In the macro analysis the data of all four lexemes in the lexical set are synthesized. The relationships among the lexemes are assessed in order to identify the basic level lexeme and consider whether the lexemes form a folk taxonomy. Finally the profiles of the four prototype meanings are collated and compared in order to describe the ancient Israelite concept of teaching. The study finds that the basic level item of the lexical set is D based on frequency of use and distribution. In its prototypical definition D means to intentionally put another person in a state in which s/he can acquire a skill or expertise through experience and practice. In contrast to this sustained kind of teaching the prototypical meaning of H is situational in nature a person of authority or expertise gives specific situational instruction to someone who lacks knowledge about what to do. The lexemes D and H represent the most restricted and the most expansive lexemes respectively the prototypical meaning of D is to attempt to bring about changed behavior in another person through verbal or physical means often to the point of causing pain the prototypical meaning of H is that a person of authority causes another person to be in a state of knowing something from the divine realm or related to experiences with the divine realm. The study determines that while the four lexemes of the Biblical Hebrew lexical set to teach have significant semantic overlap they cannot be construed in a folk taxonomy because the words are not related in a hierarchical way.
