Johnston, John E. Schulenberg, 2013-06-17 Why do some young adults substantially change their patterns of smoking drinking or illicit drug use after graduating from high school In this book the authors show that leaving high school and leaving home create new freedoms that are linked to increases in the use of cigarettes alcohol marijuana and cocaine They also show that marriage pregnancy and parenthood create new responsibilities that are linked to decreases in drug use The research is based on more than 33 000 young people followed from high school through young adulthood by the nationwide Monitoring the Future project Every two years participants reported on their drug use as well as their schooling employment military service living arrangements marriages pregnancies parenthood and even their divorces The unique qualities of this research large nationally representative samples follow ups extending up to 14 years beyond high school and multiple approaches to analysis and data presentation allowed the examination of several important influences simultaneously while retaining much of the rich detail encountered in the real world On the whole the results are encouraging suggesting that the potentials for change and improvement during the transition to adulthood are as important as the detrimental effects of problem behavior in adolescence This research is a must read for anyone concerned with how new freedoms and responsibilities impact adolescents young adults and the use of licit and illicit drugs *The Origins of American Criminology* Francis T. Cullen, Andrew J. Myer, Freda Adler, Cheryl Lero Jonson, 2011-02-11 The Origins of American Criminology is an invaluable resource Both separately and together these essays capture the stories behind the invention of criminology's major theoretical perspectives They preserve information that otherwise would have been lost There is urgency to embark on this reflective task given that the generation that defined the field for the past decades is heading into retirement This fine volume insures that their life experiences will not be forgotten The volume shows criminology to be a human enterprise Ideas are not driven primarily and often not at all by data Theories are not invented solely as part of the scientific process they are not inevitable American criminology's great theories most often precede the collection of data they guide and produce empirical inquiry not vice versa Theoretical paradigms are shaped by a host of factors scholars assumptions about the world drawn from their social constructs disciplinary content and ideology cognitive environments found in specific universities and the field's scholarly networks and quirks in a person's biography The volume demonstrates that humanity is what makes theory possible Diverse experiences when we were born where we have lived the unique trajectories of our personal life courses the disciplines and academic places we have ended up allow individual scholars to see the world differently **Criminological Controversies** John L Hagan, 2018-02-19 This book is about how to study crime It addresses the controversies in crime as a means of developing answers and of contributing to the resolution of disputes and as a means of introducing and explaining basic methods of a social science of crime **Federal Drug Abuse and Drug Dependence Prevention, Treatment, and Rehabilitation Act of 1970** United
