Toward a Unified Criminology Robert Agnew, 2011-11 Why do people commit crimes How do we control crime The theories that criminologists use to answer these questions are built on a number of underlying assumptions including those about the nature of crime free will human nature and society These assumptions have a fundamental impact on criminology they largely determine what criminologists study the causes they examine the control strategies they recommend and how they test their theories and evaluate crime control strategies In *Toward a Unified Criminology* noted criminologist Robert Agnew provides a critical examination of these

assumptions drawing on a range of research and perspectives to argue that these assumptions are too restrictive unduly limiting the types of crime that are explored the causes that are considered and the methods of data collection and analysis that are employed As such they undermine our ability to explain and control crime Agnew then proposes an alternative set of assumptions drawing heavily on both mainstream and critical theories of criminology with the goal of laying the foundation for a unified criminology that is better able to explain a broader range of crimes
