Arab Human Development in the Twenty-first Century Bahgat Korany, 2014-10-01 With its emphasis on the primacy of change this study arrives at a particularly auspicious moment as the Middle East continues to be convulsed by the greatest upheavals in generations which have come to be known as the Arab Spring Originally prepared as the tenth anniversary volume of the UNDP's Arab Human Development Report Arab Human Development in the Twenty first Century places empowerment at the center of human development in the Arab world viewing it not only from the vantage

point of a more equitable distribution of economic resources but also of fundamental legal educational and political reform. The ten chapters in this book follow closely this political economy framework. They look back at what Arab countries have achieved since the early 2000s and forward to what remains to be done to reach full development. Supported by a wealth of statistical material they cover the rule of law, the evolution of media, the persistence of corruption, the draining of resources through armed conflict, the dominance and increase of poverty, the environment and religious education. The concluding chapter attempts an inventory of the world literature and different experiences on democratic transition to explore where the region could be heading. This critical and timely study is indispensable reading to development specialists and to Middle East scholars and students alike as well as to anyone with an interest in the future trajectory of the region.

**Leadership in Science and Technology: A Reference Handbook** William Sims Bainbridge, 2011-10-20. This 2 volume set within the SAGE Reference Series on Leadership tackles issues relevant to leadership in the realm of science and technology. To encompass the key topics in this arena, this handbook features 100 topics arranged under eight headings. Volume 1 concentrates on general principles of science and technology leadership and includes sections on social scientific perspectives on key scientific concepts about leading and innovating in science, characteristics of science and strategies, tactics and tools of science leadership in government projects and research initiatives, leadership in industry research development and innovation, and finally leadership in education and university based research. By focusing on key topics within 100 brief chapters, this unprecedented reference resource offers students more detailed information and depth of discussion than typically found in an encyclopedia entry, but not as much jargon, detail or density as in a journal article or a research handbook chapter. Entries are written in language and style that is broadly accessible and each is followed by cross references and a brief bibliography and further readings. A detailed index and an online version of the work enhances accessibility for today's student audience.

**The Ambivalence of Power in the Twenty-First Century Economy** Vadim Radaev, Zoya Kotelnikova, 2022-07-07. The Ambivalence of Power in the Twenty First Century Economy contributes to the understanding of the ambivalent nature of power oscillating between conflict and cooperation, public and private, global and local, formal and informal, and does so from an empirical perspective. It offers a collection of country based cases as well as critically assesses the existing conceptions of power from a cross disciplinary perspective. The diverse analyses of power at the macro, meso or micro levels allow the volume to highlight the complexity of political economy in the twenty first century. Each chapter addresses key elements of that political economy from the ambivalence of the cases of former communist countries that do not conform with the grand narratives about democracy and markets to the dual utility of new technologies such as face recognition, thus providing mounting evidence for the centrality of an understanding of ambivalence in the analysis of power, especially in the modern state power driven capitalism. Anchored in economic sociology and political economy, this volume aims to make visible the dimensions of power embedded in economic practices. The chapters are predominantly based on post communist practices.

but this divergent experience is relevant to comparative studies of how power and economy are interrelated **Simulating Societal Change** Peter Davis, Roy Lay-Yee, 2019-01-16 This book presents a method for creating a working model of society using data systems and simulation techniques that can be used for testing propositions of scientific and policy nature The model is based on the example of New Zealand but will be applicable to other countries It is expected that collaborators in other countries can emulate this example with their data systems for teaching and policy purposes producing a cross national collaboratory This enterprise will evolve with and to a degree independently of the book itself with a supporting website as well as teaching and scientific initiatives Readers of this text will for the first time have a simulation based working model of society that can be interrogated for policy and substantive purposes This book will appeal to researchers and professionals from various disciplines working within the social sciences particularly on matters of demography and public policy
