## **Sociology Of Medical Science And Technology:**

The Sociology of Medical Science and Technology Mary Ann Elston, 1997-12-30 Contributors examine the relationship between science and clinical practice the development assessment and regulation of health care technologies and the implications of the new genetics

The Public Shaping of Medical Research Peter Wehling, Willy Viehöver, Sophia Koenen, 2014-11-27 Patient organizations and social health movements offer one of the most important and illuminating examples of civil society engagement and participation in scientific research and research politics Influencing the research agenda and initiating funding and accelerating the development of diagnostic tools effective therapies and appropriate health care for their area of interest they may champion alternative sometimes controversial programs or critique dominant medical paradigms Some movements and organizations advocate for medical recognition of contested illnesses as with fibromyalgia or ADHD while some attempt to de medicalize others such as obesity or autism Bringing together an international selection of leading scholars and representatives from patients organizations this comprehensive collection explores the interaction between civil society groups and biomedical science technology development and research politics It takes stock of the key findings of the research conducted in the field over the past two decades and addresses emerging problems and future challenges concerning the interrelations between health movements and patient organisations on the one hand and biomedical research and research policies on the other hand Combining empirical case studies with conceptual discussion the book discusses how public participation can contribute to as well as restrict the democratization of scientific knowledge production This volume is an important reference for academics and researchers with an interest in the sociology of health and illness science and technology studies the sociology of knowledge medical ethics or healthcare management and research as well as medical researchers and those involved with health related civil society organizations

*Unhastening Science* Dick Pels, 2003-01-01 This book offers a new account of what makes science special among other human pursuits critically engaging with a variety of approaches especially constructivist and relativist studies of science and technology It focuses on the studied lack of haste of science its relative freedom from stress and its socially sanctioned withdrawal from the swift pace of ordinary life Unhastening Science offers a balanced and thoughtful argument which emphasizes the dangers of cossetting science from the scourge of internal competition while at the same time highlighting the need for distance between the process of scientific thought and the faster machinery of politics business sports and the media

**Reader's Guide to the History of Science** Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

Reproduction, Health, and Medicine Elizabeth Mitchell Armstrong, Susan Markens, Miranda R.

Waggoner,2019-11-22 At a moment when reproduction is increasingly politicized the volume explores the breadth of contemporary research on reproduction from the perspective of medical sociology illuminating the lived experience of reproduction and offering insights to inform sociology and health policy      **The SAGE Dictionary of Health and Society** Kevin White,2006-01-26 authoritative and comprehensive It provides clear confident and succinct summaries of key terms concepts debates and influential figures in the field of social aspects of health Ray Fitzpatrick Professor of Public Health University of Oxford This much needed resource covers over 900 terms commonly used in the health studies field

**Biomedicalization** Adele E. Clarke,Laura Mamo,Jennifer Ruth Fosket,Jennifer R. Fishman,Janet K. Shim,2010-08-31 Essays describing how dramatic and especially technoscientific changes in the constitution organization and practices of contemporary biomedicine have coalesced since the mid 1980s in biomedicalization the second transformation of American medicine      *Devices and Designs* C. Timmermann,J. Anderson,2006-10-31 In this volume leading scholars in the history and sociology of medicine focus their attention on the material cultures of health care They analyze how technology has become so central to medicine over the last two centuries and how we are coping with the consequences      *Health, Technology and Society* Andrew Webster,2017-09-16 Examines a range of current innovative health technologies exploring how far they change the boundaries between the body health technology relationship and assessing the contribution a critical social science can make towards our understanding of this shift      **Handbook of Symbolic Interactionism** Larry T. Reynolds,Nancy J. Herman-Kinney,2003 Symbolic interactionism has a long history in sociology social psychology and related social sciences In this volume the editors and contributors explain its history major theoretical tenets and concepts methods of doing symbolic interactionist work and its uses and findings in a host of substantive research areas      **New Genetics, New Identities** Paul Atkinson,Peter Glasner,Helen Greenslade,2006-12-15 Genetic advocacy groups science and biovalue creating political economies of hope Carlos Novas Patients as public in ethics debates interpreting the role of patient organizations in democracy Annemiek Nelis Gerard de Vries and Rob Hagendijk From scraps and fragments to whole organisms molecular biology clinical research and post genomic bodies Susan E Kelly Fashioning flesh inclusion exclusivity and the potential of genomics Fiona O'Neill Mapping origins race and relatedness in population genetics and genetic genealogy Catherine Nash      **Inclusion** Steven Epstein,2008-09-15 With *Inclusion* Steven Epstein argues that strategies to achieve diversity in medical research mask deeper problems ones that might require a different approach and different solutions Formal concern with this issue Epstein shows is a fairly recent phenomenon Until the mid 1980s scientists often studied groups of white middle aged men and assumed that conclusions drawn from studying them would apply to the rest of the population But struggles involving advocacy groups experts and Congress led to reforms that forced researchers to diversify the population from which they drew for clinical research While the prominence of these inclusive practices has offered hope to traditionally underserved groups Epstein argues that it has drawn attention away from the tremendous

inequalities in health that are rooted not in biology but in society Epstein's use of theory to demonstrate how public policies in the health profession are shaped makes this book relevant for many academic disciplines Highly recommended Choice A masterful comprehensive overview of a wide terrain Troy Duster Biosocieties **440 Great Colleges for Top Students** ,
