## **Sociology Presentation Only:**

Self-Presentation and Representative Politics Derek Robbins,2022-01-11 Through six articles written at intervals of about a decade between 1960 and 2020 the book provides an account of the author s developing political awareness during the period in the context of political events and changes In this way the book illustrates the social origins of political attitudes while at the same time the articles raise questions about the increasing dominance of political discourse in society The book suggests that politics is now excessively managed by political professionals and that the challenge for reviving democratic participation is to restore the social dimension of state membership

**The Presentation of Self in Everyday Life** Erving Goffman,2021-09-29 A notable contribution to our understanding of ourselves This book explores the realm of human behavior in social situations and the way that we appear to others Dr Goffman uses the metaphor of theatrical performance as a framework Each person in everyday social intercourse presents himself and his activity to others attempts to guide and cotnrol the impressions they form of him and employs certain techniques in order to sustain his performance just as an actor presents a character to an audience The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions

**A Brief Presentation of Philosophy and Its History** Ulrich Steinworth,2024-11-28 This book presents philosophy as a historical series of answers to two questions the meaning question what does it all mean and the reality question what is real rather than illusory Presenting philosophy as a historical series of answers to these two questions gives a new view of philosophy It reveals a coherence between the disparate problems of philosophy which is not apparent when philosophy is approached in a systematic and timeless manner On the basis of this historical approach the book argues that philosophy was initially concerned primarily with the nature of reality but changed its focus when science was established as a separate discipline in the 17th century Philosophy s main concern is now the meaning question with a focus on questions of value as discussed in moral and political philosophy and in aesthetics This book is essential reading for all scholars and researchers in philosophy and especially those interested in the history of philosophy

Jeffrey Alexander,2021-03-11 This four volume work originally published in the 1980s and out of print for some years represents a major attempt to redirect the course of contemporary sociological thought Jeffrey Alexander analyses the most general and fundamental elements of sociological thinking about action and order and their ramifications for empirical study He insists that sociological thought need not choose between voluntary action and social constraint The four volumes can be read independently of one another as each presents a distinctive theoretical argument in its own right The first volume is directed at contemporary problems and controversies not only in theory but in the philosophy and sociology of science The last three volumes make interpretations confronting the individual theorists and the secondary literature on their own terms
