during the First World War and with as many as 20 000 underage soldiers leaving their homes to join the war effort the country s army was too Jim at 17 was one of them and he penned countless letters home But these weren t the writings of an ordinary boy They were the letters of a lad who left a small farming community for the city on July 15 1915 a boy who volunteered to serve with the 79th Queen s Own Cameron Highlanders Jim s letters home gloss over the horrors of war focusing instead on issues of the home front of harvesting training the horses and the price of hogs Rarely do these letters especially those to his mother and father mention the mud and rats the lice and stench of the trenches or the night duty of cutting barbed wire in no man s land For 95 years his letters remained in a shoebox decorated by his mother Jim was just 18 when he was wounded and died during the Battle of the Somme Hold the Oxo tells the story that lies between the lines of his letters filling in the historical context and helping us to understand what it was like to be Jim **Java Oracle Database Development** David Gallardo,2003 Java Database Development with Oracle is a hands on book for Java developers who want to learn how use Oracle and integrate it with their Java applications It assumes an intermediate knowledge of Java and no knowledge of Oracle This book is segmented into three parts Part One begins by investigating how and why databases relate to object oriented programming with Java Introductory chapters on the Oracle database SQL and other Oracle features including its object relational support lay the groundwork for the chapters that follow Part Two presents thorough coverage of the essential Java technologies for database programming with chapters on SQLJ JDBC and JDO Java Data Objects Part Three takes a higher level view of application architecture and considers the role of Oracle in enterprise applications particularly with regard to EJB Enterprise Java Beans and the J2EE framework _Computerworld_ ,2001-01-22 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network _Journal of Object-oriented Programming_ ,2001 **Technology Due Diligence: Best Practices for Chief Information Officers, Venture Capitalists, and Technology Vendors** Andriole, Stephen J.,2008-08-31 Due diligence conducted around technology decisions is complex Done correctly it has the power to enable outstanding positive outcomes done poorly it can wreak havoc on organizations corporate cultures and markets Technology Due Diligence Best Practices for Chief Information Officers Venture Capitalists and Technology Vendors develops a due diligence framework for anyone resolving technology decisions intended to help their business achieve positive results This essential book contains actual case studies that incorporate the due diligence methodology to assist chief information officers venture capitalists and technology vendors who wrestle with technology acquisitions challenges on a daily basis **Software Maintenance - A Management Perspective** Phaneendra Nath Vellanky,2007-10-23 Computer systems play an important role in our society Software drives those systems Massive investments of time and resources are made in developing and implementing these systems Maintenance is inevitable It is

hard and costly Considerable resources are required to keep the systems active and dependable We cannot maintain software unless maintainability characters are built into the products and processes There is an urgent need to reinforce software development practices based on quality and reliability principles Though maintenance is a mini development lifecycle it has its own problems Maintenance issues need corresponding tools and techniques to address them Software professionals are key players in maintenance While development is an art and science maintenance is a craft We need to develop maintenance personnel to master this craft Technology impact is very high in systems world today We can no longer conduct business in the way we did before That calls for reengineering systems and software Even reengineered software needs maintenance soon after its implementation We have to take business knowledge procedures and data into the newly reengineered world Software maintenance people can play an important role in this migration process Software technology is moving into global and distributed networking environments Client server systems and object orientation are on their way Massively parallel processing systems and networking resources are changing database services into corporate data warehouses Software engineering environments rapid application development tools are changing the way we used to develop and maintain software Software maintenance is moving from code maintenance to design maintenance even onto specification maintenance Modifications today are made at specification level regenating the software components testing and integrating them with the system Eventually software maintenance has to manage the evolution and evolutionary characteristics of software systems Software professionals have to maintain not only the software but the momentum of change in systems and software In this study we observe various issues tools and techniques and the emerging trends in software technology with particular reference to maintenance We are not searching for specific solutions We are identifying issues and finding ways to manage them live with them and control their negative impact   **Signal** ,2010
