Surveyors Dialogue Very Profitable For A:

John Norden's The Surveyor's Dialogue (1618) Mark Netzloff, 2016-05-06 This edition provides the first complete modern version of John Norden's *The Surveyor's Dialogue*. Norden's text a series of dialogues between a fictional surveyor and several interlocutors including a tenant farmer an aristocrat landowner a manorial officer and a socially mobile land buyer is remarkable for its unique commentary on the agrarian roots of English capitalism. In his extensive introduction Mark Netzloff situates the text in relation to a number of early modern contexts. He discusses the use of dialogue and other literary forms in proto scientific writing and the role of print in the increasing professionalism of early surveyors. Netzloff also examines the impact of capital formation on agrarian and manorial class relations discussing topics such as popular protest and revolt cottagers and the rural poor regionalism and urbanization and the transformation of the natural environment through deforestation enclosure and the appropriation of commons. Alongside a thorough annotation of technical and historical terms the edition provides a list of textual variants among early modern versions of the text. This critical edition of *The Surveyor's Dialogue* constitutes an important contribution to early modern scholarship and it will be invaluable to scholars from a range of fields including the history of science economic and agrarian history and literary and cultural studies.

Social Thought in England, 1480-1730 A.L. Beier, 2016-02-05 Authorities ranging from philosophers to politicians nowadays question the existence of concepts of society whether in the present or the past. This book argues that social concepts most definitely existed in late medieval and early modern England laying the foundations for modern models of society. The book analyzes social paradigms and how they changed in the period. A pervasive medieval model was the body social which imagined a society of three estates the clergy the nobility and the commonalty conjoined by interdependent functions arranged in static hierarchies based upon birth and rejecting wealth and championing poverty. Another model the book describes as social humanist that fundamentally questioned the body social advancing merit over birth mobility over stasis and wealth over poverty. The theory of the body social was vigorously articulated between the 1480s and the 1550s. Parts of the old metaphor actually survived beyond 1550 but alternative models of social humanist thought challenged the body concept in the period advancing a novel paradigm of merit mobility and wealth. The book's methodology focuses on the intellectual context of a variety of contemporary texts.
