*Records of the Geological Survey of India. A Collection of Scientific Papers* Anonymous, 2024-03-17 Reprint of the original first published in 1875      **Catalogue of Scientific Papers** Royal Society (Great Britain), 1872      **In Synchrony with the Heavens, Volume 1 Call of the Muezzin** David King, 2004-02-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices      **A Descriptive Catalogue of Oriental Manuscripts at St John's College, Oxford** St. John's College (University of Oxford). Library, Emilie Savage-Smith, G. J. H. van Gelder, 2005-02-10 The collection of 41 treatises in 26 Oriental manuscripts now at St John's College Oxford reflect the varying ways in which Europeans have sought to make themselves familiar with the cultures of the East Acquired between the seventeenth and nineteenth centuries most are Arabic or Persian but there are also Syriac Hebrew Turkish Ethiopic and Gujarati items No mere catalogue it includes an essay by Geert Jan van Gelder the present Laudian Professor of Arabic University of Oxford on the Arabic poetry that owners over the years jotted down on the margins and is lavishly illustrated with 37 examples of calligraphy diagrams and illuminations The catalogue provides a detailed description of every item within each manuscript Most of the manuscript volumes were acquired through the donation of Archbishop William Laud d 1645 founder of the Chair of Arabic which bears his name Several of his volumes were acquired from the traveller and adventurer Sir Kenelm Digby d 1665 who bought them in Amsterdam possibly on Laud's behalf They are an interestingly varied collection including Qur'ans and Arabic and Persian treatises on astronomical mathematical and military subjects A bilingual Hebrew Latin manuscript as well as Arabic astronomical tables came through the donation of Edward Bernard Savilian Professor of Astronomy from 1673 to 1691 Six more manuscripts were given to the College in the eighteenth and nineteenth centuries including an Ottoman Turkish letter a Gujarati merchant's map and two Hebrew thirteenth century deeds of conveyance collected by the antiquary John Pointer d 1754 one time chaplain of Merton College Oxford      *Research in the Social Scientific Study of Religion, Volume 13* Ralph L. Research in the Social Scientific Study of Religion Ralph L. Piedmont, Andrew Village, 2009 Research in the Social Scientific Study of Religion publishes empirical and theoretical studies of religion from a wide range of disciplines and from all parts of the globe. This volume has a special section on Islam and Mental Health, an important and neglected area of study. The section draws on work from six countries that have applied different theoretical frameworks and empirical methods to examine the link between religion, psychology, and health in very diverse Muslim communities. Other articles examine topics as diverse as spirituality, psychological health, conversion, and the cultural psychology of religion. Disciplines represented include those that draw on qualitative, quantitative, and theoretical methods of study, which together represent an important contribution to the contemporary study of religion. **Parliamentary Papers** Great Britain. Parliament. House of Commons, 1903 The Scientific Study of Mummies Arthur C. Aufderheide, 2003 The fact that bodies decay after death has concerned humans throughout the ages. Many cultures have attempted to arrest this decay so that bodies are preserved or mummified in a state as near to life as possible, but spontaneously mummified bodies are also found. Mummies are being studied increasingly to answer questions about the health, social standing, and beliefs of the population from whence they came, and the lessons that they have for modern populations. Originally published in 2003, this authoritative reference work explores why people mummify bodies and the mechanisms by which they are preserved, details study methods and surveys the myriad examples that can be found worldwide, evaluates the use and abuse of mummified bodies throughout the ages, and how mummified remains can be conserved for the future. Lavishly illustrated, *The Scientific Study of Mummies* will be of value to all those interested in paleopathology, archaeology, and anthropology. **Scientific Information Activities of Federal Agencies**, 1958 **Scientific Information Activities of Federal Agencies** National Science Foundation (U.S.), 1958
