women who live in the same social or institutional context and the macro micro approach which makes clear the relative importance to women s work of both individual characteristics and institutional context While a good deal of information is available on women s employment a cross national comparison over time has been lacking This book fills that all important niche *Women s Employment in a Comparative Perspective* thus has a special relevance for economists as well as sociologists and social work specialists Tanja Van der Lippe is assistant professor of sociology at the Research School ICS of Utrecht University the Netherlands Liset Van Dijk is senior researcher at the Netherlands Institute for Health Services Research Nivel
