Dieulefet, Catherine Losier, 2025-08-08 This volume examines the constitutive importance of salt cod and sugar for trade networks and the associated circulation and mobility of commodities and individuals which connected the far flung territories of the Atlantic World from the 16th century onwards While these goods are traditionally associated with distinct regions of the Atlantic World each with their own diverse historical and social context this volume presents them as a triptych through which to view the transnational impact they had Topics range across the Atlantic from the importance of Caribbean and European salt pans for the processing of cod the impact of codfish on Caribbean South American and African foodways and in return the uses of sugar and its by products for provisioning trading ships and fishing fleets The contributions collected in this volume therefore explore the nexus of entanglements between these commodities and the people who produced
