Survey Sampling And Measurement:

Survey Sampling and Measurement N. Krishnan Namboodiri, 2013-09-03 Survey Sampling and Measurement contains the invited papers presented at the Second Symposium on Survey Sampling held at Chapel Hill in April 1977 The volume is divided into seven parts Part I makes a plea towards improving the quality of sample surveys via the creation of a computerized system of information on error estimates associated with the design and execution of surveys It also suggests a realistic agenda for future work in survey sampling practice and theory Part II contains papers dealing with specific methodological problems Part III examines selected problems of analysis of survey data The papers in Part IV deal with nonresponse undercoverage and related problems Part V focuses on time series analysis Part VI discusses applications of sample survey data and methods Part VII addresses the gap between current survey practices and recent theoretical developments It is hoped that this volume will be of interest to survey statisticians as well as to survey data users If it stimulates thoughtful and courageous attack on some of the unresolved problems in survey sampling its mission will have been amply fulfilled

Surveying Subjective Phenomena Charles Turner, Elizabeth Martin, 1985-06-14 In January 1980 a panel of distinguished social scientists and statisticians assembled at the National Academy of Sciences to begin a thorough review of the uses reliability and validity of surveys purporting to measure such subjective phenomena as attitudes opinions beliefs and preferences This review was prompted not only by the widespread use of survey results in both academic and non academic settings but also by a proliferation of apparent discrepancies in allegedly equivalent measurements and by growing public concern over the value of such measurements This two volume report of the panel s findings is certain to become one of the standard works in the field of survey measurement Volume I summarizes the state of the art of surveying subjective phenomena evaluates contemporary measurement programs examines the uses and abuses of such surveys and candidly assesses the problems affecting them The panel also offers strategies for improving the quality and usefulness of subjective survey data In volume II individual panel members and other experts explore in greater depth particular theoretical and empirical topics relevant to the panel s conclusions For social scientists and policymakers who conduct analyze and rely on surveys of the national state of mind this comprehensive and current review will be an invaluable resource
