Surveying The Archaeology Of Northwest Mexico:

Surveying the Archaeology of Northwest Mexico Gillian E. Newell,Emiliano Gallaga,2004 Archaeology in the Southwest is increasingly directing its attention south of the international border as it becomes clear that a picture of the pre hispanic Southwest is incomplete without taking the Mexican Northwest into account Surveying the Archaeology of Northwest Mexico presents an overview of recent work in Sonora and Chihuahua comprising a sort of professional tour of the area The chapters offer fresh insights into the formation of centers such as Paquim Cerro de Trincheras and the Rio Sonora cabaceras Contributors explore relations between these centers individual internal organization of the various identifiable polities and the relation of the whole northwest Mexican region to better known adjacent ones The volume underscores that northwest Mexico was not a dependent hinterland but was inhabited by many independent groups throughout prehistory

The Prehispanic Ethnobotany of Paquimé and Its Neighbors Paul E. Minnis,Michael E. Whalen,2020-11-17 Paquim also known as Casas Grandes and its antecedents are important and interesting parts of the prehispanic history in northwestern Mexico and the U S Southwest Not only is there a long history of human occupation but Paquim is one of the better examples of centralized influence Unfortunately it is also an understudied region compared to the U S Southwest and other places in Mesoamerica This volume is the first large scale investigation of the prehispanic ethnobotany of this important ancient site and its neighbors The authors examine ethnobotanical relationships during Medio Period AD 1200 1450 when Paquim was at its most influential Based on two decades of archaeological research this book examines uses of plants for food farming strategies wood use and anthropogenic ecology The authors show that the relationships between plants and people are complex interdependent and reciprocal This volume documents ethnobotanical relationships and shows their importance to the development of the Paquim polity How ancient farmers made a living in an arid to semi arid region and the effects their livelihood had on the local biota their relations with plants and their connection with other peoples is worthy of serious study The story of the Casas Grandes tradition holds valuable lessons for humanity [New Perspectives on Mimbres Archaeology](#)

Barbara J. Roth,Patricia A. Gilman,Roger Anyon,2018-11-27 In the early 1970s understanding of the Mimbres region as a whole was in its infancy In the following decades thanks to dedicated work by enterprising archaeologists and nonprofit organizations our understanding of the Mimbres region has become more complex nuanced and rich New Perspectives on Mimbres Archaeology brings together these experts in a single volume for the first time The contributors discuss current knowledge of the people who lived in the Mimbres region of the southwestern United States and how our knowledge has changed since the Mimbres Foundation directed by Steven A LeBlanc began the first modern archaeological investigations in the region Many of these authors have spent decades conducting the fieldwork that has allowed for a broader understanding of Mimbres society Focusing on a variety of important research topics of interest to archaeologists including the social contexts of people and communities the role of ritual and ideology in Mimbres society evidence of continuities and cultural

change through time and the varying impacts of external influences throughout the region New Perspectives on Mimbres Archaeology presents recent data on and interpretations of the entire pre Hispanic sequence of occupation Additional contributions include a history of nonprofit archaeology by William H Doelle and a concluding chapter by Steven A LeBlanc reflecting on his decades long work in Mimbres archaeology and outlining important areas for the next wave of research

Discovering Paquimé Paul E. Minnis, Michael E. Whalen, 2016-09-13 In the mid 1560s Spanish explorers marched northward through Mexico to the farthest northern reaches of the Spanish empire in Latin America They beheld an impressive site known as Casas Grandes in the Mexican state of Chihuahua Row upon row of walls featured houses and plazas of what was once a large population center now deserted Called Casas Grandes Spanish for large houses but also known as Paquim the prehistoric archaeological site may have been one of the first that Spanish explorers encountered The Ibarra expedition occurring perhaps no more than a hundred years after the site was abandoned contained a chronicler named Baltasar de Obregón who gave to posterity the first description of Paquim many houses of great size strength and height six and seven stories with towers and walls like fortresses for protection and defense against the enemies who undoubtedly used to make war on its inhabitants large and magnificent patios paved with enormous and beautiful stones resembling jasper Casas Grandes now a UNESCO World Heritage Site is under the purview of the Instituto Nacional de Antropología e Historia which oversees a world class museum near the ruins Paquim visitors can learn about the site's history and its excavations which were conducted under the pioneering research of Charles Di Peso and Eduardo Contreras Sánchez and their colleagues from INAH and the Amerind Foundation Based on a half century of modern research since the Joint Casas Grandes Project this book explores the recent discoveries about important site and its neighbors Drawing the expertise of fourteen scholars from the United States Mexico and Canada who have long worked in the region the chapters reveal new insights about Paquim and its influence bringing this fascinating place and its story to light **A Land So**

Strange Andrés Reséndez, 2007-11-20 From a Bancroft Prize winning historian the gripping tale of a shipwrecked Spaniard who walked across America in the sixteenth century Financial Times In 1528 a mission set out from Spain to colonize Florida But the expedition went horribly wrong Delayed by a hurricane knocked off course by a colossal error of navigation and ultimately doomed by a disastrous decision to separate the men from their ships the mission quickly became a desperate journey of survival Of the four hundred men who had embarked on the voyage only four survived three Spaniards and an African slave This tiny band endured a horrific march through Florida a harrowing raft passage across the Louisiana coast and years of enslavement in the American Southwest They journeyed for almost ten years in search of the Pacific Ocean that would guide them home and they were forever changed by their experience The men lived with a variety of nomadic Indians and learned several indigenous languages They saw lands peoples plants and animals that no outsider had ever before seen In this enthralling tale of four castaways wandering in an unknown land Andrés Reséndez brings to life the vast dynamic world
