The Human Factor in Changing Africa Melville J. Herskovits,2013-11-05 Focussing on the problems of change and resistance to change that mark the African sub continent this book examines Africa s place in the world from earliest times It considers the nature of its peoples in their prehistoric development the ways in which their cultures were oriented and the ways in which these cultures guided their reactions to European ideas It also assesses the human responses to industrial technological and economic changes and the re discovery by the Africans of African culture Originally published in 1962

IMF Staff papers International Monetary Fund. Research Dept.,1975-01-01 This detailed investigation of the effects of the devaluation of sterling by the United Kingdom in 1967 examines the critical economic relationships involved in devaluation and estimates them over a period which spans the devaluation 1960 1972 Perverse effects on the trade balance which occurred in the first half of 1968 were more than compensated for by favorable effects on private services and other invisibles The cost of the devaluation in terms of inflationary pressures and welfare losses was also high The paper concludes that the favorable effect of the devaluation on the UK current balance has been seriously underestimated by the London Business School and to an even greater extent by the National Institute of Economic and Social Research in their well known studies on the 1967 devaluation They underestimated the effect mainly because they assumed based on econometric work at a very aggregative level that UK imports were not affected by relative price changes Estimates of import price elasticities obtained at a more disaggregated level do not support this contention Consolidated Translation Survey ,1968 *Foreign Commerce Weekly* ,1967 *Developing a Sustainable Economy in Cameroon* Aloysius Ajab Amin,2008 Developing a Sustainable Economy in Cameroon is an ambitious effort as the authors try to set a blue print for Cameroon s economy In the 1980s facing economic crisis and as dictated by the structural adjustment programme Cameroon sharply cut public investment expenditures before later cutting government consumption which were followed by privatisation liquidation of public companies and reduction in the size of the public sector All these measures are believed to have had devastating effects on the economy Given the performance of the economy so far the authors suggest that much more effort with a strong commitment of the main stakeholders is required to guarantee sustainable economic development in Cameroon Truly very

few countries in Africa possess such enormous human and natural resources as Cameroon does This volume brings out the challenges Cameroon faces in its quest for development as well as for designing appropriate strategies for addressing those development challenges
