military and the bureaucracy because it is within these institutions that formal power is located not the parties unions
chambers of commerce or corporations However such an approach can neglect the powerful influences exerted upon the
state by social and economic forces This important and controversial new book examines the way in which one of these forces
capital has emerged in the past two decades as a major influence upon the state its officials and policies The emergence of
the capitalist class is examined along with its internal divisions and conflicts and its relations with the state In particular
attention is given to the fusion of the ruling strata of state officials and the capitalist class the potential basis for a new ruling
class This is set against the weakness of capital caused by its division into domestic and international state and private
Chinese and indigenous These factors are in turn set in the context of international influences the rise and fall of the oil boom
the activities of the IBRD and IMF the decline of export earnings and the fiscal difficulties of the state Since its original
publication in 1986 *Indonesia The Rise of Capital* has been the best selling academic book on Indonesian politics and the
