Lowenthal, 2025-05-06 A broad and deep survey of American intelligence from before the Revolution to the present Every nation has an intelligence apparatus some means by which its top officials acquire needed information on sensitive issues But each nation does it differently influenced by its history its geographical conditions

and its political traditions In this book Mark M Lowenthal examines the development of U S intelligence to explain how and why the United States went from having no intelligence service to speak of to being the world s predominant intelligence power almost overnight and he discusses the difficult choices involved in maintaining that dominance in a liberal democracy Lowenthal describes how the lack of a tradition of spycraft both hindered and helped American efforts to develop intelligence services during and after the Second World War He points to the political pragmatism leading to difficult choices with which most intelligence directors operated the constant tension between security and civil liberties in a constitutional democracy the tension between the need for secrecy and the accountability required for democratic governance and the way the growing importance of technology changed both the methods and the objectives of intelligence gathering Far more than simply an episodic history this book offers an analysis of why American intelligence developed as it did and what it has meant for the nation s and the world s politics "When Salary is not Enough..." Eckhard Dittrich,Heiko Schrader,2015

Systemic change from a planned economy to a market society requires not only an implementation of market institutions but also the actions of people according to the new conditions in everyday life This book focuses on the question of how far middle class households are able to organize their livelihoods It presents a cross country rural urban comparison in Kazakhstan and Kyrgyzstan based on secondary data and quantitative and qualitative primary research It examines region specific questions such as Do these households take the necessary self responsibility for their lives Or do they still rely on the Soviet type nanny state of the past Or do they only believe in their own networks of kin and acquaintances for earning their livelihoods Series Societal Transformations Gesellschaftliche Transformationen Vol 20 Subject Sociology Economics Asian Studies
