Survival On The Savannah:

Savannah's Choices Donna Ketchbaw, 2008-10-16 AN EXCITING NOVEL ABOUT AN ILLICIT AFFAIR WEALTH CORPORATE POWER AND REVENGE BOOK AWARDS NATIONAL INDIE EXCELLENCE AWARDS The May 2009 National Indie Excellence Awards competition selected Savannah's Choices as one of three Finalist in the Romance Category 2010 Savannah's Choices took first in Romance category for BEST BOOKS OF THE YEAR 2010 Choices pave our destiny and Savannah Le n was forced to make some desperate choices to survive her past Heart broken and in utter despair she flees Texas in search of a new beginning far away from Tom P Hackett a ruthless and wealthy married man she loved with all her heart Savannah finds her new beginning in the majestic beauty of Jackson Hole Wyoming Here she is introduced to Mrs Clarissa Winthrop and her two loyal household employees Odie and Hoak three unforgettable characters which leave an indelible mark on the heart of the reader A ghost in Mrs Winthrop's past provides Savannah a new romantic interest the ruggedly handsome cattle baron Jake Morris Savannah finds herself torn between her love for Jake and the painful memories of her past which continue to haunt her Without warning Savannah is suddenly propelled into a life of intrigue and unexpected wealth Interwoven in this gripping story are themes of corporate power romance and revenge which Savannah wields with deadly force Tom P Hackett could not begin to imagine what it would cost him when he broke Savannah Le n's heart His betrayal and Savannah's Choices alter both their lives forever *What Is Adaptive about Adaptive Memory?* Bennett L. Schwartz, 2014 Human memory like other biological systems has been subject to natural selection over the course of evolution The goal of this volume is to present the best theoretical and empirical work on the adaptive nature of memory The volume features current and relevant work of cognitive developmental and comparative psychologists Savannah's Midnight Hour Lisa L. Denmark, 2019-12-15 Savannah's Midnight Hour argues that Savannah's development is best understood within the larger history of municipal finance public policy and judicial readjustment in an urbanizing nation In providing such context Lisa Denmark adds constructive complexity to the conventional Old South New South dichotomous narrative in which the politics of slavery secession Civil War and Reconstruction dominate the analysis of economic development Denmark shows us that Savannah's fiscal experience in the antebellum and postbellum years while exhibiting some distinctively southern characteristics also echoes a larger national experience Her broad account of municipal decision making about improvement investment throughout the nineteenth century offers a more nuanced look at the continuity and change of policies in this pivotal urban setting Beginning in the 1820s and continuing into the 1870s Savannah's resourceful government leaders acted enthusiastically and aggressively to establish transportation links and to construct a modern infrastructure Taking the long view of financial risk the city municipal government invested in an ever widening array of projects canals railroads harbor improvement drainage because of their potential to stimulate the city's economy Denmark examines how this ideology of over optimistic risk taking rooted firmly in the antebellum period persisted after the Civil War

and eventually brought the city to the brink of bankruptcy The struggle to strike the right balance between using public policy and public money to promote economic development while at the same time trying to maintain a sound fiscal footing is a question governments still struggle with today

Proceedings of the First Biennial Southern Silvicultural Research Conference James P. Barnett, 1981 *Interdisciplinary Perspectives and Advances in Understanding Adaptive Memory* Michael Togli, Henry Otgaar, Jeanette Altarriba, William Erickson, 2024-09-11 *Interdisciplinary Perspectives and Advances in Understanding Adaptive Memory* presents the latest theories and research on what is known about adaptive memory often referred to as survival memory Conceptually this is the study of memory systems that evolved to aid remembering survival and fitness relevant information In this volume survival is contextualized from many converging perspectives within psychology including comparative psychology Therefore adaptive memory in animals especially non human primates is covered in one of the book's four sections The unification of viewpoints is achieved thematically stemming from forensic science cognitive neuroscience biology computer science and anthropology This interdisciplinary approach binds the chapters together and facilitates an integrative analysis of adaptive survival memory in the concluding chapter

Neotropical Birds of Prey David F Whitacre, 2013-03-01 Until recently surprisingly little has been known about the biology and behavior of tropical forest raptors including such basic aspects as diets breeding biology habitat requirements and population ecology information critical to the development of conservation efforts The Peregrine Fund conducted a significant eight year long research program on the raptor species including owls in Tikal National Park in Guatemala to learn more about Neotropical birds of prey Impressive and unprecedented in scale this pioneering research also involved the development of new methods for detecting enumerating and studying these magnificent but often elusive birds in their forest home Beautifully illustrated with photographs of previously little known species the resulting book is the most important single source for information on the lowland tropical forest raptor species found in Central America *Neotropical Birds of Prey* covers twenty specific species in depth including the Ornate Hawk Eagle the Barred Forest Falcon the Bat Falcon and the Mexican Wood Owl offering thorough synopses of all current knowledge regarding breeding biology and behavior diet habitat use and spatial needs Contributors to this landmark work also show how the populations fit together as a community with overlapping habitat and prey needs that can put them in competition with reptiles and mammalian carnivores as well yet differ from one another in their nesting or feeding behaviors and population dynamics The work's substantive original data offer interesting comparisons between tropical and temperate zone species and provide a basis for establishing conservation measures based on firsthand research Making available for the first time new data on the

biology ecology behavior and conservation of the majestic owls and raptors of the New World tropics this book will appeal to a wide ornithological readership especially the many raptor enthusiasts around the world *Savannah Solstice* A.
