Surviving Global Change Agricultural Interest Groups In Comparative Perspective:

Surviving Global Change? Darren Halpin, 2017-11-28 This engaging volume investigates the fate of national industry associations amidst global change through analysis of interest group organizations representing farmers and agricultural producers. It asks how these groups have fared during a period of global change and examines the challenges inherent in their operation in the 21st century. Case studies from North America, Europe, and Australasia provide illuminating research into farm interest groups at the national level and organizational features of individual groups. It will be of value to scholars and researchers in the fields of global governance, political science, and rural studies. **The Organization of Political Interest Groups** Darren Halpin, 2014-01-10 Interest groups form an important part of the development of political and social systems. This book goes beyond current literature in examining the survival and careers of such groups beyond their formation. The author introduces the concept of organizational form and develops a framework to describe and evaluate organisations and uncover how they adapt to survive. Using example case studies from the UK, US, and Australia, the book presents extensive historical analyses of specific groups to better understand the organisation and position of such groups within their political system. It analyses how groups differentiate themselves from each other, how they develop differently, and what impact this has on policy implementation and democratic legitimacy. *The Organization of Political Interest Groups* will be of interest to students and scholars of political science, comparative politics, public representation, and public policy. **The Palgrave Encyclopedia of Interest Groups, Lobbying and Public Affairs** Phil Harris, Alberto Bitonti, Craig S. Fleisher, Anne Skorkjær Binderkrantz, 2022-06-20 The growing need for a concise and comprehensive overview of the world of interest groups, lobbying, and public affairs called for a compendium of existing research, key theories, concepts, and case studies. This project is the first transnational encyclopedia to offer such an interdisciplinary and wide overview of these topics, including perspectives on public relations, crisis management, communication studies, as well as political science, political marketing, and policy studies. It is an interdisciplinary work which involved an extraordinary pool of contributors made up of leading scholars and practitioners from all around the globe. It is a live and evolving project focused on drawing together grounded international knowledge for our diverse and developing world. The 200 entries of the Palgrave Encyclopedia of Interest Groups, Lobbying, and Public Affairs to be found as a live reference work online here and in two print volumes in 2022 address these research avenues, tackling a growing demand for a comprehensive international reference work regarding key global sectors and policymaking structures, looking beyond the traditional markets of Europe and North America to incorporate practice and research from Asia, Africa, Oceania, and Latin America. This encyclopedia acts as a synthesis of existing research and aims to aid academics, students, and practitioners navigate their relevant fields around the globe. **Animal Welfare in Australia** Peter John Chen, 2016-10-10 The issue of animal welfare has attracted much attention in Australia in recent decades. Activists and welfare organisations have become increasingly vigorous in promoting a new ethical relationship

between humans and animals and in challenging practices they identify as inhumane In 2011 this agitation culminated in the temporary suspension of cattle live exports with significant economic and political implications for Australia Similar campaigns have focused on domestic food production systems and the use of animals in entertainment Yet despite this increased interest the policy process remains poorly understood Animal Welfare in Australia is the first Australian book to examine the topic in a systematic manner Without taking a specific ethical position Chen draws on a wide range of sources including activists industry representatives and policy makers to explain how policy is made and implemented He explores the history of animal welfare in Australia examines public opinion and media coverage of key issues and comprehensively maps the policy domain He shows how diverse social ethical and economic interests interact to produce a complex and unpredictable climate Animal Welfare in Australia will be of interest to scholars and practitioners of public policy those interested in issues of animal welfare and anyone wishing to understand how competing interests interact in the contemporary Australian policy landscape

Transforming Food and Agricultural Policy Carsten Daugbjerg, Peter Feindt, 2019-12-18 Western democratic welfare states often featured sectoral governance arrangements where governments negotiated policy with sectoral elites based on shared ideas and exclusive institutional arrangements Food and agriculture policy is widely considered an extreme case of compartmentalized and exceptionalist policy making where sector specific policy ideas and institutions provide privileged access for sectoral interest groups and generate policies that benefit their members In the last two decades policy exceptionalism has been under pressure from internationalization of policy making increasing interlinkage of policy areas and trends towards self regulation liberalization and performance based policies This book introduces the concept of post exceptionalism to characterize an incomplete transformation of exceptionalist policies and politics which preserves significant exceptionalist features Post exceptional constellations of ideas institutions interests and policies can be complementary and stable or tense and unstable Food and agriculture policy serves as an example to illustrate an incomplete transformation towards a more open contested and networked politics Chapters on agricultural policy making in the European Union and the United States the politics of food in Germany and the United Kingdom transnational organic standard setting and global food security debates demonstrate how postexceptionalism helps to understand the co existence of transformation and path dependency in contemporary public policies The chapters in this book were originally published as a special issue of the Journal of European Public Policy
