Surviving The Information Age:

User Error Ellen Rose, 2003-09-01 User Error explodes the myth of computer technology as juggernaut Multimedia educator Ellen Rose shows that there is no bandwagon no out of control dynamo no titanic conspiracy to overwhelm us Instead there is our own desire to join the fraternity of users a fraternity that confers legitimacy and power on those who enter the brave new world Rose exposes how we surrender decision making power in personal and workplace computing situations As users we willingly grant authority to the creators of software support materials and the seductive infrastructure of technocracy Smart users are rewarded reluctant users are pathologized User identity is deliberately constructed at the crossroads of industry consumer demand and complicity User Error sounds a timely alarm calling on all of us who use the new technologies to recognize how we are being co opted With awareness we can reassert our own responsibility and power in this increasingly important interaction Savvy accessible and up to date User Error offers insight inspiration and strategies of resistance to general readers technology professionals students and scholars alike The Dynamics of Technology
