Diversification of Arid Farming Systems

P. Narain, M.P. Singh, A. Kar, S. Katju, Praveen Kumar, 2009-04-01 Over the years economic considerations have overtaken the sustainability issue Low and erratic rainfall frequent droughts the increasing costs of cultivation lower compensation of labour and inputs have made farming in the arid regions a challenging enterprise Employment opportunities in sectors other than agriculture have enticed many to cross the floor The largest segment of the farming community however is constrained to make a living from farm related activities With the opening of markets for international trade in farm commodities the competition has toughened for the resource constrained farmers of the arid regions of the country On the other hand useful technologies have been generated by researchers on many alternative systems which could be adopted In this scenario the farmers could benefit greatly by inducing diversification in the farming systems and by strengthening the traditional systems With this backdrop a National Symposium on Livelihood Security and Diversified Farming Systems in Arid Region was organized by the Arid Zone Research Association of India at the Central Arid Zone Research Institute Jodhpur from January 14-16 2006 Selected papers presented at the symposium and invited articles have been included in this compendium and are grouped in sections on Diversification Strengthening the Traditional Farming Systems Enhancing Resource Use Efficiency Livestock based Farming Systems Value Addition Socio economic Issues and Transfer of Technology Currently food water and energy crises are of global concern The challenge ahead is to strike a balance between basic needs of a large population and to maintain the pace of development Diversification of farming systems may contribute towards achieving this goal to some extent It is hoped that the book will provide options for diversification of the existing farming systems and benefit there from

Land Resources and Their Management for Sustainability in Arid Regions Anant Sadashiv Kolarkar, Dinesh Chandra Joshi, Amal Kar, 1996 The Topics Covered Dealt With The Concepts Of Sustainability Land

Resources Constraints Of Arid Regions Their Vulnerability To Degradation As The Result Of Modern Technological Applications And Sustainable Management Of Land Resources Through Agriculture **Red & Lateritic Soils** J. L. Sehgal, Winfried E. H. Blum, Kothiram Sudam Gajbhiye, 1998 **Developments in Soil Classification, Land Use Planning and Policy Implications** Shabbir A. Shahid, Faisal K. Taha, Mahmoud A. Abdelfattah, 2013-02-15 As the world's population continues to expand maintaining and indeed increasing agricultural productivity is more important than ever though it is also more difficult than ever in the face of changing weather patterns that in some cases are leading to aridity and desertification The absence of scientific soil inventories especially in arid areas leads to mistaken decisions about soil use that in the end reduce a region's capacity to feed its population or to guarantee a clean water supply Greater efficiency in soil use is possible when these resources are properly classified using international standards Focusing on arid regions this volume details soil classification from many countries It is only once this information is properly assimilated by policymakers it becomes a foundation for informed decisions in land use planning for rational and sustainable uses Pastoralism Ced Hesse, James MacGregor, 2006 Many policy makers in East Africa have preconceptions about the value of pastoralism as a land use system believing it to be economically inefficient and environmentally destructive Yet this is not evidence based Not only is there no consensus on what is a dynamic economic model of pastoralism no mechanisms exist to inform government decision making of its comparative advantages over alternative land uses This paper argues that pastoralism does make a significant contribution to society and that with better understanding planning and data collection its value can be demonstrated The paper presents a preliminary framework for assessing the benefits of pastoralism that goes beyond conventional criteria relating to livestock and their by products While the paper focuses on East Africa much of the analysis is applicable to pastoral systems in other regions of Africa
