Jordan,David Meek,Nils McCune,Damian Parr,2023-05-08   <u>School-based food and nutrition education</u> Food and Agriculture Organization of the United Nations ,2020-12-10 School based food and nutrition education SFNE helps schoolchildren and the school community to achieve lasting improvements in their food practices and outlooks build the capacity to change and to adapt to external change and pass on their learning to others SFNE has also an important role in complementing efforts that are being made globally to improve food environments and in empowering children and adolescents to become active participants in shaping the food system to be better able to deliver healthy and sustainable diets Despite increasing interest for SFNE the evidence that supports it and its potential much of traditional SFNE particularly in LMICs is largely underfunded not delivering results and disconnected from other key interventions that aim to support the food nutrition environment and education nexus SFNE is under resourced with capacity development opportunities lacking throughout the school system This White Paper is the first document of its kind and it is based on the evidence professional expertise and field experience lessons learned and documented challenges of SFNE work in a variety of contexts It presents the case for raising the profile and transforming the vision and learning model of SFNE This document is directed firstly to a technical audience working in governmental organizations that deal with schoolchildren and adolescents and is also of interest to researchers technical advisors decision makers donors and investors civil society and UN organizations   <u>Environmental Sustainability in the Mediterranean Region</u> Carla Sofia Santos Ferreira,Georgia Destouni,Zahra Kalantari,2024-09-04 The book provides a cross sectoral assessment of the most relevant environmental challenges in the Mediterranean region including land and water degradation water and food security and solution opportunities for these It also discusses main change drivers such as changes in climate land use population demographics and technology Additionally the book explores improved management participatory planning and nature based strategies and measures for meeting the key environmental challenges e g restoring degraded areas and improving land management in different land uses e g forest coastal and urban areas Finally the book addresses needs and opportunities to improve governance and partnerships for assuring sustainable development in the Mediterranean region   *Development of voluntary guidelines for the sustainability of the Mediterranean diet in the Mediterranean region* Food and Agriculture Organization of the United Nations,2018-06-06 The Mediterranean diet is attracting international attention as a healthy and sustainable diet yet countries in the region are increasingly beset by problems of undernutrition combined with obesity or

other food related diseases This book highlights the need to consolidate the Mediterranean diet as a lever to improve the sustainability of food systems and consumption in the region **Sustainable Food Systems** Terry Marsden,Adrian Morley,2014-01-21 In response to the challenges of a growing population and food security there is an urgent need to construct a new agri food sustainability paradigm This book brings together an integrated range of key social science insights exploring the contributions and interventions necessary to build this framework Building on over ten years of ESRC funded theoretical and empirical research centered at BRASS it focuses upon the key social economic and political drivers for creating a more sustainable food system Themes include regulation and governance sustainable supply chains public procurement sustainable spatial strategies associated with rural restructuring and re calibrated urbanised food systems minimising bio security risk and animal welfare burdens The book critically explores the linkages between social science research and the evolving food security problems facing the world at a critical juncture in the debates associated with not only food quality but also its provenance vulnerability and the inherent unsustainability of current systems of production and consumption Each chapter examines how the links between research practice and policy can begin to contribute to more sustainable resilient and justly distributive food systems which would be better equipped to feed the world by 2050

Handbook of Sustainability Science in the Future Walter Leal Filho,Anabela Marisa Azul,Federica Doni,Amanda Lange Salvia,2023-08-14 Humanity will have to cope with many problems in the coming decades for instance the world population is likely grow to to 8 8 billion people by 2035 Also changing climate conditions are negatively affecting the livelihoods of millions of people In particular environmental disasters are causing substantial damages to properties From a social perspective the inequalities between rich and poor nations are becoming even deeper and in many countries conflicts between national and international interest groups are intensifying The above state of affairs suggest that a broader understanding of the trends which may lead to a more sustainable world is needed especially those which may pave the way for future developments In other words we need to pave the way for sustainable futures Consistent with this reality the proposed Encyclopedia of Sustainability Futures aims to identify document and disseminate ideas experiences and visions from scientists member of nongovernmental organisations decision makers industry representatives and citizens on themes and issues which will be important in pursuing sustainable future scenarios In particular the publication will focus on scientific aspects as well as on social and economic ones also considering matters related to financing and infra structures which are important in pursuing a sustainable future The Encyclopedia of Sustainability Futures will involve the contributing authors in line with theprinciple of co generation from across a wide range of disciplines e g education and social sciences natural sciences engineering the arts languages etc with papers adopting a long term sustainability perspective with a time horizon until 2050 The focus will be on themes which are felt as important in the future and the chapters are expected to interest and motivate a world audience This book is part of the 100 papers to accelerate the implementation of the UN

Sustainable Development Goals initiative **Towards Sustainable Global Food Systems** Ruerd Ruben,Jan Verhagen,2019-04-30 One of the major knowledge challenges in the domain of Resilient and Sustainable Food Systems refers to the integration of perspectives on consumption patterns that support public health inclusive value chains and environmentally sustainable food production While there is a long record of the analysis of separate interventions this special issue generates integrated insights provides cross cutting perspectives and outlines practical and policy solutions that address these global challenges The collection of papers promotes the view that sustainable food systems require thorough insights into the structure and dynamics of agri food production systems the drivers for integrating food value chains and markets and key incentives for supporting healthier consumer choices On the production side potential linkages between agricultural commercialization and intensification and their effects for food security and nutritional outcomes are analyzed Value Chains are assessed for their contribution to improving exchange networks and markets for food products that simultaneously support efficiency circularity and responsiveness Individual motives and market structures for food consumption need to be understood in order to be able to outline suitable incentives to enhance healthy dietary choice The contributed papers focus on interfaces between food system activities and processes of adaptive change that are critical for overcoming key constraints and trade offs between sustainable food and healthy diets **Integrated Organic Farming Systems: Approach for Efficient Food Production and Environmental Sustainability** Subhash Babu,Sanjay Singh Rathore,Vinod Kumar Singh,Raghavendra Singh,2023-10-24 Researchers and policy planners are in search of a solution to address the twin challenges of maximizing agricultural production while maintaining improving ecosystem sustainability Enhancing farm productivity is needed in certain regions of the world to satisfy local food consumption and farmers needs Linear economy based input intensive conventional agriculture CAPS has increased production output but has not made agriculture more sustainable Henceforth a farming system that aims to reduce the adverse impact on the environment as well as enhance agricultural productivity by reducing environmental footprint and improving soil health and economic wellbeing is needed in the present day Integrated organic farming systems IOFS involve residue recycling bio intensive cropping high tech horticulture mushroom dairy poultry fishery apiary etc can improve the ecosystem health and augment the income and livelihood security of the growers Worldwide IOFS are gaining popularity due to improved ecosystem services and improving farm productivity and livelihood security Hence IOFS a circular economy based reuse recycle repair agricultural production system can be alternatives to energy intensive inputs based on CAPS Hence there is an urgent need to select suitable IOFS models with proper resource optimization for productivity maximization and better ecosystem sustainability Undoubtedly IOFS reduces energy use from synthetic agrochemicals but food production in IOFS is highly dependent on fossil fuel energy that must be addressed urgently Despite the enormous positive outlooks there are several challenges in the adoption of IOFS models The IOFS is a multiproduct oriented production system that needs multi

specialties and marketing Capacity building and infrastructure development are also great challenges in adopting IOFS Moreover the development of IOFS models is highly individualistic and location specific production systems need proper resource optimization and characterization Hence the development of site specific IOFS models to maintain food quality with productivity improvement is a genuine issue to the researchers which needs to be addressed Papers original research review letter to the editors spanning across the discipline related to the IOFS development in sustainable ways are encouraged for inclusion in this research topic Papers should explicitly cover ecosystem restoration farm productivity and profitability and could have a specific focus on the following areas the IOFS models for enhancing productivity and environmental quality through an integrated management approach aiming at the maximization of use efficiencies the management of biomass waste to restore the soil fertility and ecosystem services the effect of integrated management practices on greenhouse gas emissions and energy use Critical approaches for climate smart food production systems **The Mediterranean Diet** Victor R Preedy,Ronald Ross Watson,2020-07-07 The Mediterranean Diet An Evidence Based Approach Second Edition provides authoritative material on the many facets surrounding the complex interrelationships between diet nutrition health and well being The book discusses historical cultural and scientific foundations with chapters delving into nutritional adequacy agricultural practices food culture mortality quality of life children and adolescents behavior cardiovascular diseases diet quality nutritional knowledge nuts minerals olive oil hydroxytyrosol water antioxidant nutritional status ketogenics adiposity metabolic syndrome type 2 diabetes cardiovascular risk nutrigenetics epigenetics the link between epigenetics and pregnancy gene polymorphisms bone health insulin signaling inflammatory gene expression and more Provides supportive evidence to embrace a holistic approach in understanding the Mediterranean diet from the cell to the well being of geographical populations Addresses concepts overviews components of the diet and medical health and nutritional aspects Contains coverage of emerging fields of diet science and important discoveries relating to diet and nutrition AI and IoT: Driving Business Success and sustainability in the Digital Age Bahaa Awwad,2025-08-11 This book explores the integration of AI technologies with emerging trends such as IoT blockchain and cloud computing In this book readers will embark on a transformative journey that explores the powerful convergence of Artificial Intelligence AI Internet of Things IoT and business management With the advent of these cutting edge technologies businesses have unprecedented opportunities to revolutionize their operations drive innovation and achieve remarkable success in today s digital landscape Encyclopedia of Food Security and Sustainability ,2018-11-08 The Encyclopedia of Food Security and Sustainability Three Volume Set covers the hottest topics in the science of food sustainability providing a synopsis of the path society is on to secure food for a growing population It investigates the focal issue of sustainable food production in relation to the effects of global change on food resources biodiversity and global food security This collection of methodological approaches and knowledge derived from expert authors around the world offers the research community food industry scientists and
