Climate Change in the South Pacific: Impacts and Responses in Australia, New Zealand, and Small Island States Alexander Gillespie, William C.G. Burns, 2006-04-11 ALEXANDER GILLESPIE WILLIAM C G BURNS The idea for this book grew out of the Ecopolitics conference in Canberra Australia in 1996 The conference captured the ferment of the climate change debate in the South Pacific as well as some its potential implications for the region s inhabitants and e systems At that conference one of the editors Gillespie delivered a paper on climate change issues in the region as did Ros Taplin and Mark Diesendorf who are also c tributors to this volume This book focuses on climate change issues in Australia New Zealand and the small island nations in the Pacific as the world struggles to cope with possible the impacts of environmental change and to formulate effective responses While Australia and New Zealand s per capita emissions of greenhouse gases are among the highest in the world their aggregate contributions are small However both nations may exert a disprop tionate influence in the global greenhouse debate because their obstinate positions at recent conferences of the parties to the United Nations Framework Convention on C mate Change FCCC may provide justification for other developed nations as well as developing countries to refuse to make meaningful reductions in their greenhouse gas emissions

of Climate Change Mitigation Innovations David S-K. Ting, Jacqueline A. Stagner, 2024-04-18 The notion that humanity may be too late to alter climate change could potentially lead to fear and therefore the advocacy of implementing radical strategies and or hastening the execution of certain measures to the extreme There is evidence that extensive and intensive implementation of some climate change solutions can significantly alter the environment and ecosystems in unintended ways For example the microclimate of a field in the proximity and downstream of a closely packed array of wind turbines can be noticeably altered by the modified lower atmospheric fluxes caused by the turbines which can then negatively affect crop yields Additionally some studies have found that large scale solar fields can result in the modulation of atmospheric circulation leading to changes in regional precipitation The Costs of Climate Change Mitigation Innovations A Pragmatic Outlook provides a forum for discussion on the long term consequences of various climate strategies It promotes our striving toward minimizing the potential negative impact of new interventions by performing objective holistic analyses The bottom line is that we do not want today s solutions to become tomorrow s problems *Globalization of Low-Carbon Technologies*

Venkatachalam Anbumozhi, Kaliappa Kalirajan, 2017-10-30 This book explores the opportunities and barriers within the Intended Nationally Determined Contributions INDC framework of the Paris Agreement for low carbon technology diffusion Further it proposes appropriate and feasible mechanisms required at local national and regional levels to achieve the INDC targets The book employs both meta policy analysis and scenario building to examine whether the diffusion of low carbon energy future by 2030 is economically viable under the INDC framework and how international technology cooperation could accelerate investments on the scale required for achieving the INDC targets Further this book provides new perspectives on market and non market mechanisms for the globalization of low carbon technologies within the framework conditions of the
