Sustainable Management of Wetlands Jyoti K. Parikh, 2003-07-26 This work is a very comprehensive and multidisciplinary study of Indian wetlands This is a valuable book for scholars and students in the field of environment ecology development biology geography economics and anthropology it is an invaluable resource for policy makers environmentalists industrialists and NGO s International Journal of Environmental Studies Wetlands are among the most productive and biologically rich ecosystems on earth yet their management has been gradually neglected This has endangered the livelihoods and survival of the people depending upon these wetlands This is the first book that studies the protection and management of wetlands from a multidisciplinary angle by India s premier ecologists *Sustainable Management of Wetlands* ,2003 Bringing together well known experts from a variety of disciplines and dealing with an issue of considerable importance this book will be of interest to scholars and students in the fields of environment ecology development biology geography economics and anthropology It will also serve as an invaluable resource for policy makers environmentalists and NGOs Jacket **Faunal**

**Heritage of Rajasthan, India** B.K. Sharma, Seema Kulshreshtha, Asad R Rahmani, 2013-10-14 This is the first ever monumental and scientific documentation of the faunal wealth of the Indian Desert state of Rajasthan This volume the second of two provides a comprehensive picture of the conservation efforts undertaken to prevent further degradation of the condition of Rajasthan s faunal wealth A scholarly contribution to the field of knowledge it provides novel and vital information on wildlife preservation initiatives in India s largest state Broadly falling under the Indo Malaya Ecozone the three major biomes of Rajasthan include deserts and xeric shrublands tropical and subtropical dry broadleaf forests and tropical and subtropical moist broadleaf forests The corresponding ecoregions to the above biomes are respectively the Thar Desert and northwestern thorn scrub forests the Khathiar Gir dry deciduous forests and the Upper Gangetic Plains moist deciduous forests Contrary to popular belief the well known Thar or Great Indian Desert occupies only a part of the state Rajasthan is diagonally divided by the Aravalli mountain ranges into arid and semi arid regions The latter have a spectacular variety of highly diversified and unique yet fragile ecosystems comprising lush green fields marshes grasslands rocky patches and hilly terrains dense forests the southern plateau fresh water wetlands and salt lakes Apart from the floral richness there is faunal abundance from fishes to mammals In this volume the various flagship and threatened species are described in the 20 chapters penned by top notch wildlife experts and academics The world famous heronry tiger reserves wildlife sanctuaries and some threat ridden biodiversity rich areas shall certainly draw the attention of readers from around the world

Valuation of Coastland Resources Indira Hirway, Subhrangsu Goswami, 2007 National income statistics which form the basis for measuring and monitoring the performance of an economy do not include environmental resources adequately with the result that they fail to provide the required inputs for the formulation of sound economic policies particularly in the context of sustainable development Coastal resources are important in a country like India which is surrounded by sea from

three sides and mangroves the salt tolerant forest ecosystem that is one of the richest ecosystems in the world provides a wide range of ecological and economic products and services including carbon sequestration and protection to life and property under severe cyclones and tsunamis However mangroves are neglected as their value is not incorporated in the national income data The present study which is a methodological study compiles economic value of mangroves in India and shows that this rich ecosystem contributes significantly to the economy and it needs to be strengthened in order to promote sustainable development of coastal regions and to protect coastal population from cyclones and tsunamis Book jacket

Gunawardena,Brij Gopal,Hemesiri Kotagama,2020-11-29 This book provides an ecosystem perspective in addressing the water resource management issues in the South Asian region It argues that aspects such as sources of water its distribution and users land water interrelations drivers of change such as laws policies and institutions management of issues and technologies related to water supply institutional set up economic instruments such as pricing taxes subsidies and economics of ecosystem services are crucial Climate changes melting of glaciers and polar ice caps rising sea level and the increased frequency of extreme events have to be factored into integrated management of water resources This book addresses some of these major issues related to aquatic ecosystems and focuses on three major aspects a concepts related to ecosystems ecosystem services and their linkages with water b human impacts on ecosystems particularly the aquatic ecosystems and their assessment and c the management including policy governance and economics Comprising new theories research and case studies the book will be useful those concerned with water resource management professionals students and researchers      **Application of Nanotechnology for Resource Recovery from Wastewater** Jitendra Kumar Pandey,Syed Mohammad Tauseef,Suvendu Manna,Ravi Kumar Patel,Vishal Kumar Singh,Ankit Dasgotra,2024-02-06 Most of the time industrial wastes contain recoverable resources that would be useful in other applications For example greywater have enough nutrient to support the growth of microalgal biomass that are useful for biofuel production Similarly solid waste generated in metal extraction industries often contain high concentration of other metals that could be extracted using various processes This book presents a critical overview on the current nanotechnologies that are being utilized for extraction of valuable resources from various industrial and domestic wastes This book presents research reviews and case studies on the extraction of metal organic compounds energy and nutrients from waste through nanotechnological interventions      **Water and African American Memory** Anissa J. Wardi,2025-03-25 While there is no lack of scholarship on the trans Atlantic voyage and the Middle Passage as tropes in African diasporic writing to date there has not been a comprehensive analysis of bodies of water in African American literature and culture In Water and African American Memory Anissa Wardi offers the first sustained treatise on watercourses in the African American expressive tradition Her holistic approach especially highlights the ways

that water acts not only as a metaphorical site of trauma memory and healing but also as a material site Using the trans Atlantic voyage as a starting point and ending with a discussion of Hurricane Katrina this pioneering ecocritical study delves deeply into the environmental dimension of African American writing Beyond proposing a new theoretical map for conceptualizing the African Diaspora Wardi offers a series of engaging and original close readings of major literary filmic and blues texts including the works of Toni Morrison Ntozake Shange Julie Dash Henry Dumas and Kasi Lemmons

**Environment and Development Economics** ,2004 *Ecology, Economy and Society* Vikram Dayal,Anantha Duraiappah,Nandan Nawn,2018-07-30 This book deals with not just complex linkages interactions and exchanges that form the relationship between the economic activities human society and the ecosystems but also the influences and impacts that each causes on the other In recent times this ecology economy society interface has received unprecedented attention within the broader environment development discourse The volume is in honour of Kanchan Chopra one of the pioneers of research in these areas in India She has recently been awarded the coveted Kenneth Boulding Award by the International Society for Ecological Economics ISEE and is the first Asian to receive it The four sub themes of the book reflect some of the important areas in the environment development discourse sustainability of development institutions and environmental governance environment and well being and ecosystem and conservation Within each of the sub themes the policy and the practice as well as the macro and micro aspects are addressed With contributions mainly from ecological economists and ecologists the book s approach is interdisciplinary both in spirit and content reflecting the honoree s work which went not just beyond the mainstream ideology of economics but also the way she listened to ideas from disciplines like ecology and sociology The volume also includes two reflective essays on academic life and works of Kanchan Chopra The book is a valuable resource for students teachers researchers practitioners and policy makers in the areas of development economics ecological economics environmental economics and related disciplines such as conservation development ecology economics environment governance health sociology and public policy *Abstracts of Public Administration, Development, and Environment* ,2005

**Historical Dictionary of India** Surjit Mansingh,2006-05-09 The Republic of India is the second most populous the seventh largest by geographical area and has the fourth largest economy in terms of purchasing power parity in the world While it has always been an important country it has often been neglected Of late however there has been much talk of the new India one with greater economic dynamism a more active foreign policy and the emergence of a huge middle class With over a hundred new cross referenced dictionary entries the majority of which pertain to the last decade and updating others the second edition of the Historical Dictionary of India illustrates the rapidly evolving situation without neglecting the country s ancient past The chronology has been brought up to date the introduction expanded and the bibliography includes numerous new titles **Wetlands of Tropical and Subtropical Asia and Africa** Thammineni Pullaiah,2025-05-27 A comprehensive survey of exemplary wetlands that highlights their importance for local livelihoods as well as for global

**Toni Morrison and the Natural World** Anissa Janine Wardi,2021-06-28 Winner of the Toni Morrison Society Book Prize for Best Single Authored Book 2019 2022 Critics have routinely excluded African American literature from ecocritical inquiry despite the fact that the literary tradition has from its inception proved to be steeped in environmental concerns that address elements of the natural world and relate nature to the transatlantic slave trade plantation labor and nationhood Toni Morrison s work is no exception Toni Morrison and the Natural World An Ecology of Color is the first full length ecocritical investigation of the Nobel Laureate s novels and brings to the fore an unequalled engagement between race and nature Morrison s ecological consciousness holds that human geographies are enmeshed with nonhuman nature It follows then that ecology the branch of biology that studies how people relate to each other and their environment is an apt framework for this book The interrelationships and interactions between individuals and community and between organisms and the biosphere are central to this analysis They highlight that the human and nonhuman are part of a larger ecosystem of interfacing and transformations Toni Morrison and the Natural World is organized by color examining soil brown in The Bluest Eye and Paradise plant life green in Song of Solomon Beloved and Home bodies of water blue in Tar Baby and Love and fire orange in Sula and God Help the Child By providing a racially inflected reading of nature Toni Morrison and the Natural World makes an important contribution to the field of environmental studies and provides a landmark for Morrison scholarship

*Beyond Malthus* Lester R. Brown,Gary Gardner,Brian Halweil,2014-04-08 On the bicentennial of Malthus legendary essay on the tendency of population to grow more rapidly than the food supply this book examines the impacts of population growth on 19 global resources and services including food fresh water fisheries jobs education income and health Despite current hype of a birth dearth in parts of Europe and Japan the fact remains that human numbers are projected to increase by over 3 billion by 2050 Populations in rapidly growing nations are in danger of outstripping the carrying capacity of their natural support systems and governments in such situations will find it

increasingly hard to respond to crises such as AIDS food and water shortages and mass unemployment Beyond Malthus examines methods such as the expansion of international family planning investment in educating young people in the developing world and promotion of a shift towards smaller families which will represent the most humane response to the possible ravages of the population explosion      **Resolutions and recommendations: World Conservation Congress, Jeju, Republic of Korea, 6-15 September 2012** ,      Social Action ,2003      **Undervalued and Overlooked** ,2004
