Smith,R. Esteban Montilla,2013-02-01 For the Latino population the family bond is powerful and enduring Family serves as the primary source of support care guidance and healing all difficulties that arise for an individual are surmounted together Therefore a practitioner working with a Latino client must gain the trust and respect of the family in order to carry out treatment efficiently He or she must essentially become a part of that family to encourage members to share their issues without the concern of breaching the confidence of the family Counseling and Family Therapy with Latino Populations helps

the therapist to join the Latino family in order to identify and explore the difficulties that threaten their welfare. With this fundamental principle as the basis, the book's editors and contributors write chapters that focus on work with children and adolescents, group counseling, and substance abuse counseling. They incorporate specific case studies, methods, and strategies for intervention and provide insight into the cultural relevance behind each example. This book is a necessary resource for therapists working with Latino clients who wish to offer effective techniques while continuing to value the integrity of family tradition.

It has become increasingly apparent that an appropriate understanding of culture is essential for treatments to be effective and for optimal outcomes to be obtained by individuals suffering from these conditions. This text focuses on cross-cultural issues arising in the context of diagnosis, treatment, and research of mood disorders within diverse populations of the United States. With specific case examples to supplement the topics reviewed in each chapter, this important volume will be of great interest to all clinicians and researchers working in the area of mood disorders.
