Mithen, 1990-06-29 Thoughtful Foragers is about hunter gatherer decision making The author explores the implications of the human mind as a product of biological evolution for the way in which humans solve foraging problems He draws on studies from ethology psychology and ethnography prior to turning his attention to prehistoric hunter gatherers He attempts to construct explanations for patterns in the archaeological record by an explicit focus on decision making by individuals Thoughtful Foragers will appeal to specialists in European prehistory as well as to those interested in archaeological theory and method It makes some very significant advances which will be of real importance for the field of evolutionary theory in relation to human evolution and the evaluation of human social systems
