Synthetic Fuel Technology Development In The United States:

Synthetic Fuel Technology Development in the United States Michael Crow, 1988-11-17 Direct coal liquefaction a synthetic liquid fuel process is one of the major developmental alternatives for meeting the anticipated fuel demands for the twenty first century This work provides a retrospective assessment of past attempts in this century to develop synthetic liquid fuel and applies the findings to produce reliable and pertinent data for the future Retrospective technology assessment a recent methodological invention is used by the authors to analyze the past synthetic liquid fuel programs and the reasons for their failures Bringing to bear four different perspectives economic technological policy and historical the authors draw broad conclusions that will help guide the next development effort in the United States *Industrial Fuel Gas Demonstration Project, Memphis* ,1981 **Solvent Refined Coal-1 Demonstration Project** ,1981 **The End of Energy** Michael J. Graetz, 2011-03-04 Forty years of energy incompetence villains failures of leadership and missed opportunities Americans take for granted that when we flip a switch the light will go on when we turn up the thermostat the room will get warm and when we pull up to the pump gas will be plentiful and relatively cheap In *The End of Energy* Michael Graetz shows us that we have been living an energy delusion for forty years Until the 1970s we produced domestically all the oil we needed to run our power plants heat our homes and fuel our cars Since then we have had to import most of the oil we use much of it from the Middle East And we rely on an even dirtier fuel coal to produce half of our electricity Graetz describes more than forty years of energy policy incompetence and argues that we must make better decisions for our energy future Despite thousands of pages of energy legislation since the 1970s passed by a Congress that tended to elevate narrow parochial interests over our national goals Americans have never been asked to pay a price that reflects the real cost of the energy they consume Until Americans face the facts about price our energy incompetence will continue and along with it the unraveling of our environment security and independence **SCR-II Demonstration Project, Fort Martin** ,1981 *Department of Defense Petroleum Requirements and Supplies* United States.
