Synthetic Membranes:

Synthetic Membranes: P.M. Bungay, H.K. Lonsdale, M.N. de Pinho, 2012-12-06 The chapters in this book are based upon lectures given at the NATO Advanced Study Institute on Synthetic Membranes June 26 July 8 1983 Alcabideche Portugal which provided an integrated presentation of synthetic membrane science and technology in three broad areas Currently available membrane formation mechanisms are reviewed as well as the manner in which synthesis conditions can be controlled to achieve desired membrane structures Membrane performance in a specific separation process involves complex phenomena the understanding of which requires a multidisciplinary approach encompassing polymer chemistry physical chemistry and chemical engineering Progress toward a global understanding of membrane phenomena is described in chapters on the principles of membrane transport The chapters on membrane processes and applications highlight both established and emerging membrane processes and elucidate their myriad applications It is our hope that this book will be an enduring comprehensive compendium of the state of knowledge in the field of synthetic membranes We have been encouraged in that hope by numerous expressions of interest in the book coming from a variety of potential users
